U.S. Eases Curbs On S. Africa Trade

Sales of Nonmilitary Goods to Police And Armed Forces Is Seen Possible

By William Chapman and John M. Goshko

Washington Post Service WASHINGTON - The Reagan administration has relaxed restrictions on trade with South Africa, and congressional and State Department sources said this could open the door for sales by U.S. companies of nonmilitary goods to that country's military and police

in another trade-related move that has a background of controeasy, the administration also acted to remove Iraq from the list of countries formally regarded as supporters of international terrorism, and it moved to add Cuba.

On Saturday, the State Department defended the decision Friday to relax trade restrictions with South Africa while a leading Senare liberal condemned the move as the foreign policy equivalent of tax exemptions to segregated private

Sen. Edward M. Kennedy, Democtat of Massachusetts, said that the action was supportive of South Africa's apartheid policy and the "equivalent in our foreign policy of the administration's blatant recent attempt to give tax exemp-tions for segregation in the United

The reference was to the administration's decision last month to reverse Internal Revenue Service policy of refusing tax exemptions to private schools that discriminate on the basis of race. The reversal touched off a political furor, and the administration hastily agreed to push for legislation to close off exemptions for such schools.

The State Department said that the new trade rules were intended to be "less arbitrary from the perspective of U.S. exporters" while still maintaining a "strong symbolreactical disassociation" from the policy of apartheid, or ra-

It added that the new rules, which reverse a four-year-old Carter administration policy blocking sales of even nonmilitary goods to the South African govern-ment, are "at least as extensive" as trade controls maintained by other

major Western nations. The United States forbids the sale of military equipment to South Africa as part of a UN em-

The new regulations do not permit the sale of arms or military equipment, but congressional critics said the changes would permit the sale of nonmilitary equipment that could be converted to military use, citing as an example the sale of large transport planes to civilian

The State Department said that such sales would be permitted only on condition that the aircraft not be used for police, military or paramilitary purposes, but written assurances of this, "which constituted a paperwork burden both on exporters and on the U.S. govern-ment," would no longer be re-

The new regulations are to take effect at midnight Sunday, but Congress or the administration muy alter them before they become final 30 days later. The 1979 Export Administration Act requires that Congress be notified when sales of equipment with potential military use are proposed for countries on the list — a requirement that in the past has resulted in congressional moves to block some sales of this type.

The policy shifts on South Africa and Iraq emerged in a set of revised export-control regulations issued by the Commerce Depart-ment with the concurrence of the State Department

CIA Says Qadhafi Was Target Of Assassin

By Bob Woodward Washington Past Service
WASHINGTON — The CIA

has concluded that an assassina-tion attempt was directed against Col. Moamer Qadhafi two months ago and that, although the Libyan leader was not seriously injured, he probably was nicked by a bullet in the jaw, according to informed of-ficials

News reports of the assassination attempt initially were dis-missed last month, and the U.S. media gave them little or no attention. But a senior government offi-cial said last week that the CIA now has sufficient evidence to confirm the reports.

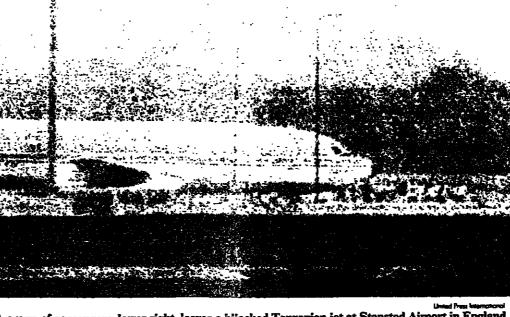

The official said that the plot was carried out by some members of Col. Qadhafi's army, probably by one or more officers who had just returned from the Libyan in-vasion of Chad. He said that the plot had received no external support from any foreign country, in-cluding the United States.

The attempt was understood to have been made during the last two weeks of December, shortly after the first major reports sur-faced in the United States about "hit squads" allegedly sent by Li-bya to assassinate President Reagan and other high-ranking U.S. officials.

On Dec. 6, Col. Qadhafi denied in a U.S. television interview that any such squads or individuals had been sent. "We are sure we haven't sent any people to kill Reagan or any other people in the world," he

previous European initiative on gin's decision to annex the Golan Heights — a step that at the time caused Mr. Mitterrand to postthe Middle East as undermining the Camp David accord between Egypt and Israel and arousing un-realistic expectations about Eu-rope's ability to put pressure on Ispone his Israel trip.
France's significant economic and political interests in Arab

countries are also strongly defended by the French Ministry of External Relations, which is comfortable with the Arab policy adopted after the 1967 Middle East war. France depends on the Gulf for imported oil and for industrial and arms contracts to maintain both jobs and the iranc.

Politically, France seeks to play a peace-making role in the Middle East, Mr. Mitterrand aides say, to prevent the area from being polarized between the superpowers.

France hoped that the peace plan of Saudi Arabia's Crown Prince Fahd would provide a united Arab negotiating position in-corporating a conditional recogni-tion of Israel, which would open the way to wider negotiations after the Camp David accords.

Diplomats say the Europeans led by France, intended to use the Fand plan as a step toward obtaining PLO recognition of Israel. In return, the United States would try to persuade Israel to focus on new peace agreements, instead of territorial annexation of the Golan Heights or the West Bank, as a ba-

Dr. George O. Poinar Jr., in Berkeley, Calif., holding a camera he used to study a 40-millionyear-old gnat, at right, found mummified in Baltic amber. The gnat is so well preserved that researchers hope to extract, and possibly grow, some of the genetic material DNA from its cells.

40-Million-Year-Old Preserved Fly Found

By Harold M. Schmeck Jr. New York Times Service

NEW YORK - A mummified insect has been found with much of its soft tissues apparently intact after 40 million years, scientists at the University of California at Berkeley have reported. The specimen is so well preserved that elements within cells appear to be visible, they said.

The find is by far the oldest to show structures within cells and the oldest in which much of the chemical makeup of the tissues may have been preserved, the scientists said. Usually, mummified tissues are only a few

thousand years old. "And even some in the thousands has not been preserved as well," said Dr. George O. Poinar Jr., an insect pathologist and the principal scientist in the study. In specimens many millions of years old, only bones and hard tissues are ordinarily preserved.

Normally, virtually all the original tissues have been infiltrated and replaced by minerals, retaining details of external shape but not the original chemistry or internal structure. The preservation appears to be so good, Dr. Poinar said, that a colleague hopes to extract some of the genetic material — DNA — from its

cells an attempt to grow it for study purposes. If that proved possible, scientists would be able, for the first time, to observe directly how much change has taken place over 40 million years by comparing the genetic material of the ancient specimen with that of similar flies alive today.

The insect, a female fungus gnat, is imbedded in transparent Baltic amber, according to a report in the current issue of the journal Science, it was brought to the Berkeley team from Poland, Builli, amber, fossilized resin from conferous trees, was formed 40 million years ago or even earlier, wientists estimate, after the great age of the dinescurand early in the evolution of mammals.

Mummified tissues that still retain their o-iginal chemical makeup are usually several thousand years old at most. The best-known examples are Egyptian mummies and some freezen remains of mammoths found in such places as Siberia. Ages, of the manmoths may be more than 10,020 years. In the case of the insect studied at Berlieley, the soft tissues were evidently deliverated and nreserved when the gnat got stuck in the resin that

later became amber. "In essence, what we are describing," the report said, "is on extreme case of mummification, involving the preservation of insect tissue by drying

and natural embalming."

The insect's tissues were so well preserved that cell nuclei and other, even smaller, intracellulastructures were visible under electron microscopic examination, according to the report.

Pictures accompanying the report showed bize! specks identified as the chromatin that is characteristic of cell nuclei; muscle fibrils; arrays of membranes; mitochondria and fat deposits as well as other intracellular structures. Mittechendria are the minute energy-supplying atructures within living cells.

By Joseph Lelyveld New York Times Service

PRETORIA -- Prime Minister Pieter W. Botha overcame a challenge to his leadership of the governing National Party by its extreme right-wing during the weekend and effectively ousted his chief rival from the party hierarchy.

The rival, Andries P. Treumicht.

entered a hall belonging to a wing of the Dutch Reformed Church here Saturday morning as leader of the National Party in the country's wealthiest and most populous province, the Transvaal. When he emerged six hours later, he had been stripped of his membership in the party's executive committee and politically humiliated on a motion of confidence that affirmed Mr. Botha's right to interpret party policy on key racial is-

The vote on the motion was lopsided, 172 to 36, and it meant that the party machinery in the crucial province had been wrested from Mr. Treumicht's control. The prime minister has given dissident party members until Wednesday to reverse their stand on the confidence motion taken here Saturday and in the parliamentary cancus earlier in the week. If they fail to do so, they will be expelled from

the party.
[Neither Mr. Botha nor Mr. Treurnicht would comment Sunday on the implications of Saturday's vote, Reuters reported, but other opponents of Mr. Botha's policies stressed that they intended

to leave the party.
[One rebel member of Parliament who was at Saturday's meeting, Daan van der Merwe, said: "For me the break is final. Only the formalities remain. I represent white South Africa, my volk [peo-ple] and Christian nationalism."

Observers forecast that up to 17 Nationalist members of Parliament could quit the party after Wednesday, Renters said.]

Principle Debated

There appeared to be no chance of Mr. Treurnicht's surrendering on the issue that sparked Saturday's confrontation — a semantic debate over the question of whether power sharing with Indians and people of mixed race, called coloreds, was consistent

Trustees at Duke Postpone Project For Nixon Library Washington Post Service

WASHINGTON — Plans for a Richard M. Nixon presidential li-brary at Duke University have been put off by school trustees. In an election year, congressional ap-proval for the library would be unfikely, university counsel Eugene McDonald said, and, in the current budget climate, it would be difficult to raise even private funds

The Duke board of trustees de-cided Friday "not to aggressively pursue" the Nixon library project, Mr. McDonald said. He said Duke will continue efforts to bring the Nixon archives to its campus at Durham, N.C., "but in the current climate the decision was to make haste slowly."

Stan Mortenson, Mr. Nixon's lawyer in Washington, told The Associated Press he was uncertain of the library's status.

Duke president Terry Sanford proposed last summer that the li-brary be built at Duke. Mr. Nixon is a 1937 graduate of Duke University Law School. But after mounting opposition, led by a political science professor, the Duke faculty senate voted in September against bringing the library to the campus. But Duke trustees went ahead with negotiations to use private money to build it.

Chile Police, Activists Clash United Press International

SANTIAGO — Police and about 1,200 labor activists clashed Saturday during a funeral service for slain union leader Tucapel Jimenez, who was a critic of the military government's economic policies. There were no reports of arrests or injuries. Mr. Jimenez, 59, was shot and stabbed to death by unknown assailants on Thursday.

with the principle of "white self-determination."

The debate never touched on the question of political rights for South African blacks, who account for slightly more than 70 percent of the 28 million people in the

Despite Mr. Botha's victory Saturday, the split last week was the most severe that the governing party has experienced since it came to power in 1948. It could still have far-reaching implications for the ability of Afrikaners, who account for 60 percent of the white population, to maintain the dominance they have enjoyed since then. But this cannot really be tested until the next election, which need not be called for four years.

Mr. Treurnicht will probably have fewer than 20 supporters in the all-white Parliament when he crosses the floor after his expected expulsion from the governing par-ty. This would not be enough to make him the official leader of the opposition, a post that now be-longs to Frederik van Zyl Slabbert of the relatively liberal Progressive Federal Party, which has 27 seats. But for the first time, the governing party will have to face an open challenge in Parliament from the extreme right.
Mr. Boths might be tempted to

call an early election in an attempt to deprive Mr. Treumicht of his entary platform and an opportunity to form an effective working alliance with splinter groups such as the Herstigte National Party. But an election would be a gamble for the governing party, because grass-roots backing for the inflexible stand Mr. Treumicht has taken in support of strict apartheid doctrines is believed to be much stronger than the vote here Saturday indicated.

Curbs Eased On S. Africa

tors and personal communication equipment are on the list of items no longer embargoed. Chemicals and industrial equipment could also be sold if they are of no national security concern, according to the regulations.

A State Department official, who declined to be identified, said Friday night that the department would make a case-by-case review of all sales and would prohibit any sale that could be used to enforce apartheid.

Critics of the move asserted that it symbolized an administration plan to move closer to the South African government at the risk of further alienating black Africans.

There was no practical signifi-cance to adding Cuba to the terrorism list, since the United States has a han on trade with that country. However, the dropping of Iraq is expected to draw considerable protest from members of Congress who regard the Baghdad government as an active abettor of terrorism as well as an enemy of Israel.

Congressional sources said they een told that business interests had put pressure on the ad-ministration to permit sales of equipment such as the L-100, the civilian version of the C-130 cargo plane, to the Iraqis.

Pope Reportedly Met With SWAPO Leader

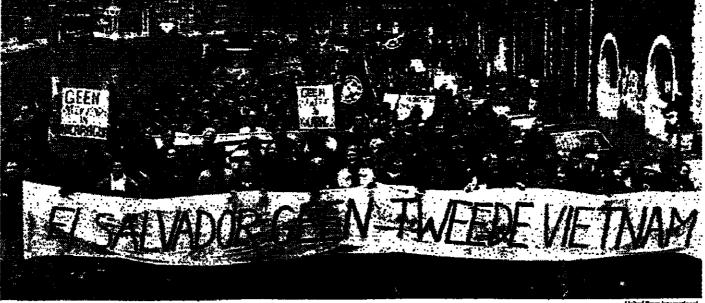

VATICAN CITY -- Pope John Paul II received Sam Nujoma, leader of the South-West African Peoples Organization, and Oliver Tambo, president of the banned African National Congress in South Africa, in a private audience at the Vatican during the weekend, the Italian news agency ANSA re-

The Vatican did not announce the meeting in its daily bulletin of papal audiences and a Vatican spokesman refused to confirm or deny that the meeting had taken place. But ANSA said the papal audience Saturday was revealed on the second day of the Rome con-ference of "Solidarity with the People of Southern Africa," organized by representatives of Italy's five coalition parties.

In Salvador, No Middle Ground for Refugees Victimized by Both Left and Right, Homeless Have 'Nothing to Go Back to'

By Joanne Omang ngton Post Service

SAN ESTEBAN CATARINA, El Salvador Antonio Martínez is 38 but looks 50, and sits shumped against the corrugated cardboard wall of the refugee center he now calls home.

wail of the refugee center he now calls home.

The guerrillas came well before dawn, he says, shot three of his sons and ordered him to leave town with nothing but what he wore.

On that night in October, 1980, nearly 50 families fled from the small collection of houses in the hills 6 miles (9½ kilometers) north of this rural town, stumbling down a dry riverbed in the darkness to get here. And here most of in the darkness to get here. And here most of

them remain, either afraid to return or, like Mr. Martinez, empty of hope.

"They took the chickens, the goat, the ducks, everything. There's nothing left to go back to," he said.

In three church-run centers near the provincial capital of San Vicente are about 1,500 refugees, many of whom say that guerrilla terror-ism has ruined their lives. With the earnest, weathered faces of the rural poor, they are just as believable as the thousands of refugees in other camps who say they fied from Salvadoran armed forces or from rightist terrorists.

A Woman's Story

In San Vicente, Concepción Amaya de Carrillo waited in line patiently for powdered milk and beans at the food-supply center run by Caritas, the local charity arm of the Roman Catholic Church. She said she had lived as the wife of a tenant farmer in the village of El Rodeo near San Isidro, 15 miles northeast of San Vicente, until one night last October.

"The guerrilla terrorists banged on my door at 3 a.m.," she recalled. "They said we could either join them or get out, or we would die in 24 hours." She and her husband and three children fled with what they could carry. How did she know the introders were guerrillas? "We know. They had big guns. They did not wear masks, and their accent was pure San Isidro,"

Leftists here argue that such incidents are often the work of military men disguised as guerrillas. "The final victory depends on the

WASHINGTON — The Civil

"Although it's still a terribly

NEW YORK — The Reagan ad-

good will of the people. Why should 'the guer-rillas' alienate them that way?" asked a leftist. The government says many murders blamed on rightist or military terrorists are actually on rightist or military terrorists are actually committed by guerrillas settling internal disputes. Both sides agree that common criminals take advantage of the general violence to commit other crimes, and both sides say that they shoot spies and persons collaborating with the opposition.

The charges from either side are often impossible to verify. The army often works with members of the militia who carry rifles while dressed as civilians, and the guerrillas often wear stolen military uniforms.

Attack in Yamabal

In the town of Yamabal, near San Miguel in eastern El Salvador, three men dressed as regnlar army soldiers arrived Feb. 22 saying they were the first of a company coming to protect the village and wanted to review the Civil Guard. When the men were lined up, the three opened fire, killing 11 men and wounding five. The killers escaped, and newspapers reported that scores of people fled Yamabal for San Mi-

The civil war here seems always to burst forth that way, sporadically and unpredictably. Every guerrilla push and every military operation seem to create more refugees.

Estimates of the displaced now range up-ward from 500,000, or 10 percent of the popu-lation, with two-thirds of them out of the

In this part of El Salvador, a 90-minute bus ride northeast of the capital, the army has just completed a four-day sweep against suspected guerrilla camps. "Some of the refugees from that action are now coming in," said David de Jesus Bonilla, the director for 15 years of San. Vicente's branch of Caritas. Mr. Bonilla showed with little pride the

Tuesday.

Juana Gabriela Portillo, 50, has two narrow beds for her family of nine, and four of them sleep on the ground. The family left the village of La Esperanza, near Tecoluca, last August when the guerrillas came through. And although the army has declared the region cleared of rebels, "we can't go back there," Mrs. Portillo said. "They took our clothes, the pots and pans even, and they told us never to come hold." come back. I was very scared."

When the guerrillas first rose against El Salvador's rulers in the early 1970s, "they weren't violent; if the people didn't want to join them, they were very polite," recalled the Rev. René Valle, priest of San Esteban Catarina. "But many resisted and many were 'ears' — government spies — and finally the boys began to shoot also."

Father Valle came here in August, 1979, when his predecessor, the Rev. Napoleon Macias, was shot in church. "Yes, he had gotten involved in politics. We still aren't sure which side killed him... No, there was no investigation. There never is."

After that shooting, many residents left here for San Salvador, flexing from the rightist terrorists whom they blamed for the shooting, Father Valle continued. The refugees' homes were occupied by other refugees from rural areas who were fleeing from the guerrillas.

Dr. Carlos Roberto Navarrete works long hours at Caritas' clinic in San Vicente, treating worms, skin troubles, dysentery, tuberculosis and other diseases of the poor. He has worked here for six years, and he said the number of people who are brought in with severe mental problems has increased 25 percent during the last two years.

"There is so much fear, and when they lose everything, it's hard to cope," Dr. Navarrete

Mugabe Says Nkomo Plotted War

BULAWAYO, Zimbabwe — Prime Minister Robert Mugabe told a political rally Sunday that ousted government partner Joshua Nkono was plotting to instigate a civil war, the Ziana news agency said.

WORLD NEWS BRIEFS

Speaking at a gathering in Umtali in eastern Zimbabwe, Mr. Mugabe said the arms caches found on farms owned by Mr. Nkomo's organization were enough evidence that he intended to overthrow the government. He added that Mr. Nkomo was plotting to avenge his defeat by Mr. Mugabe's majority party at the polls by instigating a civil war. The prime minister also said security officials had arrested officials of Bishop Abel Muzorewa's United African National Council who were found in possession of arms, Ziana reported.

Meanwhile, the central committee of Mr. Nkomo's party this weekend rejected his call to quit the coalition government and go into opposition

Japanese Workers Rally for Tax Cut

The Associated Press TOKYO - In Tokyo's first mass labor rally since 1974, Japanese workers converged on a park Sunday and demanded 1 trillion yen -about \$4.3 billion — in tax cuts for fiscal 1982.

Sponsors put the number of participants at 200,000, while police said there were 66,000 demonstrators at Yoyogi Park in central Tokyo. The rally was called amid charges by workers that their purchasing power has dwindled under a five-year freeze on maximum nontaxable income. In 1980, the average income for a family of four in Japan was the equivalent of \$15,900, of which about \$1,100 was paid in taxes, a tax official said. Premier Zenko Suzuki's government so far has refused a tax cut, saying there are no financial resources to support it,

Papandreou, in Cyprus, Vows Support The Associated Press

NICOSIA — Andreas Papandreou, making the first visit to Cyprus by a Greek premier, pledged his government's "unlimited support" to the island in ending the Turkish military presence there. He criticized the Western allies for tolerating the Turkish invasion in 1974. Speaking upon his arrival Saturday, he said he was launching "an international crusade to internationalize the Cyprus problem." He was

greeted warmly by crowds estimated at 200,000.

Sunday, he laid a wreath at the tomb of the island's first president, Archbishop Makarios, on remote Throni Mountain. Mr. Papandreou later conferred separately with the leaders of the four main Greek-Cypriot political parties and was scheduled to address the parliament.

8 Killed, 20 Hurt in Beirut Explosion

United Press Internationa BEIRUT - Eight persons were killed and 20 wounded in the fourth terrorist bomb explosion in Beirut in less than a week, police said, as U.S. presidential envoy Philip C. Habib discussed ways of saving a southern Lebanon cease-fire that he helped to negotiate seven months

The bomb, which police and witnesses said was packed in a small station wagon, went off on Saturday, near an elementary school and a Syrian Army checkpoint during rush-hour traffic at the southern entrance to Beirut.

In a telephone call to a western news agency in Beirut, the Organiza-tion for the Liberation of Lebanon from Foreigners claimed responsibility for the explosion. The caller said the wave of bombings would continue until April 28, when the six-month mandate of Syrian peacekeeping forces in Lebanon expires. The same group claimed two bombings last Tuesday, in which seven persons were killed.

U.S. Reportedly to Put First MXs in Colorado, Wyoming, Nebraska

By Robert C. Toth

.

WASHINGTON — The Pentagon has decided that the first 40 of its MX missiles will be spread through Wyoming, Nebraska and Colorado and based in existing. unhardened Minuteman silos, it has been learned.

Subsequently, the Delication Subsequently the partment is expected to order conparation of as many as 14 additional siles around each sile containing an MX missile in order to hide, or "deceptively base," the weapon, Pentagon officials said. weapon, Pentagon ornerals

Each MX will be housed in a transportable cannister.

Eventually, officials said, an anti-ballistic missile defense may be ordered built to protect the MX installations — a move that could destroy the current ABM treaty with the Soviet Union and severely damage chances for future arms control agreements. Under the existing ABM treaty, the United States can erect such a defense system only at its Grand Forks, N.D.,

missile base.

The Air Force rejected under Grand Forks base for the MX missiles because geological features of bedrock and water table level are less favorable there than at the sites in Wyoming. Colorado and Nebraska.

ord age of

of the way

The state of

1:379

While the unannounced decision The covers only 40 MX missiles, it will create a powerful momentum for basing some or all of the additional mobile missiles — between 60 and 160 more of them — in the same complex, which currently holds 200 Minuteman missiles and is commanded from Warren Air Force Base near Cheyenne, Wyo.

Cost Incentive

Lower cost will be the major incentive for putting all MXs there. After the first 40 are built and installed at the huge Warren missile field, each additional missile-sile combination will cost only onetenth as much as the first 40.

Regardless of future decisions, the move — scheduled to be announced March 9 — is expected to be a major step toward ending the protracted debate over the MX

President Jimmy Carter pro-posed building 200 MX missiles, each with 10 warheads, to be moved in a "shell game" fashion among 4,600 horizontal shelters in the deserts of Utah and Nevada. Such a system was considered relatively invulnerable to attack. Mr. Reagan attacked Mr. Carter's

MX basing scheme though not the missile itself. But once in office, Secretary of Defense Caspar W. Weinberger was unable to come up with a better alternative. In October the president announced he was killing the plan for basing the missiles in Utah and Nevada, where Mr. Reagan had won great political support. Mr. Reagan postponed until mid-1984 a decision on where to put the MX missile permanently. Interim Plan

in the interim, he said, 100 MX missiles would be built, with the first 36 put in "superhardened" silos now occupied by the aging Ti-tan missiles. After superhardening the silos, the MX missiles would be up to 25 percent safer from de-struction than the Titans were, Mr. Weinberger explair

Congressional Republicans and Democrats immediately opposed the Reagan plan. Most criticism was directed at the superhardened silo concept, which the Air Force had studied and discarded years before. By the end of the year, Mr. Weinberger agreed that the Titan silos could not be sufficiently hardened and ordered the first MX

But the idea of modifying the Minuteman silos was soon scrapped, too, in large part be-cause the cost — about \$3 billion for 40 siles -- would buy very little additional protection for the mis-

vices Committee, have agreed that empty silos will be built around the MX silos, defense officials said. In this way, Mr. Weinberger will not seem to be reversing himself totally on his opposition to putting MXs into existing unhar-dened silos since they will be protected, in a sense, by the deceptive nature of the nearby empty silos,

At the same time, however, the MX missile will end up in a deceprive basing mode that differs only in its shelter position — vertical vs. horizontal — and number — up to 14 to 1 MX instead of a 23 to 1 ratio - from the Carter plan that he and Mr. Reagan so criticized.

The 40 MX missiles will be put into operation between 1986 and 1988. How and when the final decision will be made to dig the additional empty silos was not known.

McNamara Challenges Reagan Aid Priorities

By Barbara Crossette

WASHINGTON — The Reagan administration's response to the needs of the Third World is being challenged in a report published by the Overseas Development Council and by the council's chairman, Robert S. McNamara, a former president of the World Bank.

The report published Saturday by the council, a private organiza-tion engaged in research on devel-oping nations, says the United States should make a greater commitment to development aid and place less emphasis on military or strategic considerations.

The report, "U.S. Foreign Policy and the Third World: Agenda 1982," says the United States has fallen almost to the bottom of the

Back Changes in Nominating Rules

WASHINGTON — Despite warnings of potential opposition from women, big states, and state party chairmen, the executive com-

only exceptions to votes Friday in favor of a resolution commending the commission's plan. But the abstentions were explained at length and outlined the dissents that may be heard when the full national committee considers the proposals at a meeting scheduled for March

one complaint by defending a decision to let House and Senate caucuses choose up to two-thirds of the Democrats in Congress as auiomatic national convention delegates. This, he said, was the only way the lawmakers would agree to

Low Marks

In a meeting with reporters last week, Mr. McNamara said that while he applauded President Reagan's speech Wednesday em-phasizing liberalized trade policies in the Caribbean region, he gave the administration "very low marks" in addressing the problems of the poorest countries world-

Mr. McNamara was critical of a recent Treasury Department recommendation that there be a 30to 45-percent reduction in development funds for low-income countries made available through international lending institutions.

The report, the work of a team of scholars, was described by its supervisor, Professor Robert D. Hansen of the Johns Hopkins School of Advanced International Studies, as a critique of "neo-orthodoxy" in foreign policy plan-

The "hawks" of neo-orthodoxy, Prof. Hansen wrote in his summary of the report, "equate U.S. inability to control events in today's world with a decline in U.S. military power." The result, he said, is a preoccupation with the Soviet Union and a tendency to view all Third World developments in an

Williams Found Guilty missiles — now to number 40 in-stead of 36 — into Minuteman Of 2 Atlanta Killings Two and a half days later, the body of Nathaniel Cater, a 27-

By Wendell Rawls Jr. New York Times Service

ATLANTA - Wayne B. Williams has been found guilty of kill-ing two of 28 missing and mur-dered young blacks and sentenced to prison for two consecutive life

The verdict came Saturday night after a nine-week trial. "Tm sure there will be an appeal," said Alvin Binder, the lead defense lawyer for Mr. Williams, 23, a free-lance photographer and self-styled music promoter. "I'm sure that there are good grounds for an appeal, but I doubt that I will be in the case after today." Lewis Slaton, the district attor-

ney who prosecuted the case, read the verdict. Mr. Williams and his 68-year-old father were then al-lowed to make statements before sentence was pronounced.

"I maintained all along through the trial my innocence and I still say so today," the defendant said. "I just hope the person or persons who committed these crimes can be brought to justice. I still say I didn't do this.... I more than any-one wanted to see this terror end, but I did not do it."

His father, Homer Williams, said: "I feel that this is an error of justice. In fact, I don't see how anyone anywhere can find my son gnilty. It is unjust and I will say that anywhere in the world. Nobody has brought any evidence to prove that my son is guilty."

dence most damaging to his de-list of 17 donor nations in the Or-fense of Mr. Williams. "It certainly wasn't the witnesses." found on the bodies of the victims were linked with fibers taken from Mr. Williams' home.

10 Other Cases

trict attorney will try to prosecute Mr. Williams in the 10 other murder cases from which evidence was permitted in the trial case to show a pattern of behavior by the defendant and a pattern of evidence

against him.

Under Georgia law, Mr. Williams will be eligible for parole in Mr. Williams first came to the

attention of law enforcement offi- ilies earning less than \$20,000, accials early on the morning of May cording to the Congressional 22. Authorities had begun watch-22. Authorities had begun watching bridges after the bodies of young blacks were found in the Chattahoochee and South rivers. Two Atlanta police recruits, a police officer and an FBI agent were stationed at a bridge over the

Chattahoochee on the northwest outskirts of Atlanta.

The recruit below the bridge heard a loud splash. In court, he said he pointed his flashlight at the water, where he saw ripples spreading. He said he radiced the recruit on the bridge, told him of the splash and asked if he could see a car. The second recruit answered that a car was driving slowly toward him.

The police officer, stationed at the end of the bridge, testified that he saw the car turn around and head back across the bridge. The officer said he and the FBI agent stationed at the opposite end of the bridge stopped the car on Interstate Highway 285. Wayne B.

year-old vagrant, surfaced about a mile downstream from the bridge. Mr. Williams was questioned by police, then released. FBI agents

questioned him the next day and arranged for surveillance. On June 3, he was brought to FBI head-quarters and held for 12 hours to undergo questioning and lie detec-tor tests while his home was He was arrested June 21. A

county grand jury subsequently indicted him in the murders of Mr. Cater and Jimmy Ray Payne, 21, hose body had been found in the Chattahoochee near where Mr. Cater's surfaced. The first two bodies were found

on July 28, 1979, about 150 feet apart in woods in southwest Atlanta. Other disappearances and deaths of young blacks followed in the next year, but no obvious links or particular pattern to the killings erged. For more than a year, police in-

vestigators insisted there was no reason to believe the deaths were unusual. But because of public essure and friction among the law enforcement agencies in the counties where the bodies were found, a special task force was formed to investigate the killings. On Aug. 21, 1980, 12-year-old Clifford Jones, who was visiting from Ohio, was found strangled,

China Ignores 10th Anniversary of Nixon Trip

By Michael Parks Los Angeles Times Sernce

PEKING - In a mark of its unhappiness over continued U.S. arms sales to Taiwan, China virtually ignored the 10th anniversary Sunday of the Shanghai communique that began the reconciliation between Peking and Washington and laid the foundation for the establishment of diplomatic rela-

tions three years ago. Despite its practice of celebrating such major diplomatic anniversaries. China did not hold a ceremony commemorating President Richard M. Nixon's 1972 journey to China, nor did it issue any statement assessing Chinese-American relations or calling for continued

cooperation.

The Chinese news media did report on a dinner given Friday in New York for Mr. Nixon by the Chinese ambassador to Washington. Chai Zemin, who was quoted as saying that it was "regrettable that difficulties came up due to the U.S. sale of weapons to Taiwan." Sino-American strategic relations should continue to develop, instead of stagnating or retrogress-ing." Mr. Chai said, according to the Chinese news agency. Mr. Chai said he hoped both sides would

strive to overcome the serious obstacles existing between the two countries," the agency reported.

Letter From Reagan The Chinese news media passed over a letter from President Reagan last week to Premier Zhao Ziyang marking the anniversary of the communique and calling for a resolution of the dispute over con-

tinued U.S. arms sales to Taiwan. The media also ignored a speech Saturday by Secretary of State Alexander M. Haig Jr. to a conservative political group in Washington in which he stressed the strategic importance of China to the United States. The Chinese Foreign Ministry had no immediate comment on either U.S. gesture. U.S. officials would not disclose

the contents of the Reagan letter, delivered through diplomatic chan-nels, but described it as part of a "good faith effort" to settle the arms sale issue.

Arthur Hummel Jr., the U.S. ambassador to Peking, has been meeting regularly with senior Chi-nese officials for the past six weeks on the question, which will deter-mine the course of Chinese-American relations. Mr. Haig described the talks last month as "extremely sensitive" and at a "delicate

No progress in the talks is ap parent, however, and Chinese offi-cials speak with unrelieved gloom about their outcome. "I am not at all optimistic," a deputy foreign minister said recently, and Deng Xiaoping, the Communist Party deputy chairman, who negotiated 1978 agreement establishing full diplomatic ties, told an American visitor last month that "Sino-American relations are not good."

Analysis of U.S. Cuts It is not expected that the dissist attorney will try to prosecute Shows Burden on Poor

By Spencer Rich

Washington Past Service
WASHINGTON — About 86
percent of the U.S. income tax benefits enacted by Congress last year will go to families with in-comes of more than \$20,000 a year, while two-thirds of the cuts in benefits will be taken from fam-

The study said low-income fami-lies would realize small tax savings from Mr. Reagan's tax cuts while high-income families would do ex-

tremely well.

A family with income under \$10,000 would average \$120 a year in tax savings. One with income from \$10,000 to \$20,000 would average \$440; one with income from \$20,000 to \$40,000 would average \$950 in tax savings, and one with income from \$40,000 to \$80,000 would average \$1,830.

A family with income of more than \$80,000 would average \$15,250 in tax reductions. Those families would end up with a fifth of the \$82 billion in 1983 tax sav-

The figures were contained in a study requested by Sen. Ernest F. Hollings, Democrat of South Carolina, and Rep. James R. Jones. Democrat of Oklahoma, chairman of the House Budget Committee.

Sen. Hollings and Rep. Jones, who made the study public Satur-day, said that "fairness is a critical element in any budget" and "the CBO study speaks clearly on the fairness of the Reagan program."

In computing reductions of wel-fare and related benefits to different income groups, the budget office took into account cuts voted last year in Social Security, Medicaid, Medicare, unemployment in-surance, food stamps, welfare, fuel aid, educational benefits and veterans' programs.

The expected reductions in fis-cal 1983 totaled \$17.5 billion. About \$6.9 billion of that will be cut from families with incomes under \$10,000 and \$4.6 billion from families with incomes from \$10,000 to \$20,000, so about twothirds of the cut comes from fami lies under the \$20,000 figure.

The average family making less than \$10,000 will lose \$360 in benefits, while gaining \$120 a year from the tax cuts, a net loss of \$240. Families from \$10,000 up will have a net gain from the com-bined impact of the tax cut and benefit cuts.

The study, looking at U.S. grants to states and localities, said cuts would range from \$12 bil to \$14 billion from fiscal 1982 to 1984, and about three-fifths would come from programs directed toward low-income families.

Unusual Neglect Underlines Dispute Over U.S. Weapons Sales to Taiwan

certain, for both sides are adhering character, scope and duration of to an agreed news blackout on the the sales — in effect, a U.S. comnegotiations — the proposals each side is making possible compromises, even the locale and frequency

The Reagan administration is of the talks - to prevent the influential Taiwan lobby in Washington from attacking an agreement before it is reached.

China has gone so far as to say publicly that it would accept con-tinued U.S. arms sales to Taiwan if quired under U.S. law to provide

rassing diplomatic failure, is not there were agreed limits on the

believed to be discussing the question in detailed terms, but U.S. officials resist suggestions that they are actually negotiating such a limit. The U.S. view remains, these of-

for the island's defense and cannot enter into an international agreement that would conflict with this

responsibility.
China continues to insist that the sale of U.S. arms to Taiwan, which is recognized by the United States as a Chinese province, is gross interference in its internal affairs, akin to Peking selling weapons to, say, some insurgent group

"We are making a major effort to bridge these difficulties," Mr. Haig said last month. "... I am not in a position to predict the out-

Haig, Addressing Conservatives, Stresses Value of Tie With China

By Oswald Johnston

Los Angeles Times Service WASHINGTON — Secretary of State Alexander M. Haig Jr. has warned some of his harshest critics on the political right not to over-look the strategic value of the United States' relationship with

Defending his policies against accusations of softness and moderation, Mr. Haig also explained Saturday that human rights conditions in Guatemala whose rightist government has the support of many conservatives in the United States, disqualified that country for U.S. aid.

And the secretary again defended the Reagan administration's refusal to impose unilateral trade embargoes on Poland and the Soviet Union that would damage economic interests in Western Eu-

Taking the offensive on many issues, Mr. Haig won frequent and prolonged applause from his 300-member audience of the Conservative Political Action Conference, which has been critical of his poli-

imperialism in Southeast Asia and declaring his opposition to normalizing U.S. relations with Hanoi.

But he pointed out that the one force that has restrained Vietnamese aggressiveness has been "the People's Republic of China and the threat that North Vietnam

Iran Vows to Join Syria In Fight Against Israel

DAMASCUS — Iran's president, Hojatoleslam Ali Khamenei, has promised to join Syria in its struggle against Israel after the end of the 17-month-old war between Iran and Iraq, the Syrian news agency SANA reported Sunday.

Hojatoleslam Khamenei was replying to a message of congratu-lations from Syrian President Hafez al-Assad on the third anniversary of Iran's Islamic revolu-tion. The reply, published by SANA, said Iran considered the Golan Heights and Jerusalem "as ours and as an occupation of our lands." Israel annexed the Golan On China, Mr. Haig partially Heights of claimed his listeners by denouncing Soviet-backed Vietnamese July, 1980. Heights on Dec. 14 and pro-claimed Jerusalem its capital in feels from the Chinese forces on their northern border."
He added: "Too frequently today in contemporary terms we neglect to take full weight of the stra-

regic importance of the American relationship with the People's Re-public of China."

Referring to Taiwan, the fa-vored China of most of his audi-ence, Mr. Haig said of his earlier statements: "Do not misread that as a plea to try to make new friends at the expense of old, but take it as a very strong caution that we must not look aside at the vital

strategic role that the People's Republic can play in the region."
Regarding Guatemala, Mr. Haig again began with tough talk, supporting U.S. policy in Central America. He accused the news media of applying a double standard in calling El Salvador another Vietnam. "The American people are not unwilling to support a sound effort to do whatever is right — provided they believe we mean business and are going to succeed," he said.

Guatemala is pressed by "exter-nal subversion and external terror." Mr. Haig said, but policies of its government do not permit the U.S. administration to offer aid di-

Reagan Asks Conservative Critics To Help Broaden National Base

By George Skelton Los Angeles Times Service

WASHINGTON - President Reagan has called upon his increasingly critical fellow conserva-tives to join him in a "new crusade" to build a lasting, majority coalition of "Main Street Americans" not devoted to any single is-sue who will elect like-minded politicians to office.

Only then, the president warned, can conservatives achieve the they desire.

in essence, Mr. Reagan asked them to stop complaining that his administration is not conservative enough and to join him in trying to enough and to join him in trying to win congressional passage of his latest round of proposed cuts in domestic spending and increases in funding for defense.

Mr. Reagan's speech Friday to the Conservative Political Action Conference highlighted three days of intercive proping by the admir-

of intensive wooing by the administration of New Right activists who lately have been critical of the president's politics and appointees.

Sensitivity Seen

Mr. Reagan's sensitivity toward the criticisms of conservatives, who throughout his political career have comprised the core of his support, was illustrated by the many Cabinet officers and other high administration officials he dispatched to address this relativesmall convention of about 400

Mr. Reagan, addressing the group for the second consecutive year, asked it to join him "in a new effort, a new crusade." "Nostalgia has its time and

place," he said. "Coming here to-night has been a sentimental journey for me, as I'm sure it has been for many of you. But nostalgia isn't enough. The challenge is now. It's time to stop looking back-wards at how we got here. The president, in effect, was re-

minding his conservative audience of the politically obvious: that they need to build a popular coalition of voters who will elect like-minded politicians to office long after he ceases to carry their banner. "We must reach out and appeal

to the patriotic and fundamental ideals of average Americans who do not consider themselves 'movement' people, but who respond to the same American ideals we do." he said. "I'm not talking about some vague notion of an abstract, amorphous American mainstream. I'm talking about Main Street
Americans in their millions.

"They come in all sizes, shapes and colors - blue-collar workers, blacks, Hispanics, shopkeepers, scholars, service people, housewives and professional men and women. They are the backbone of America and we cannot move America without moving their hearts and minds as well," he

Rome Daily American Sold, Will Continue

The Associated Press ROME — A group of Italians and Americans, headed by Anselmo Crisafulli, an Italian criminal tional Daily News publisher Robert Cunningham Jr., has purchased the Rome Daily American at a bankruptcy court auction for \$120,000.

Mr. Cunningham said Friday that both the Rome Daily American and the International Daily News would continue publishing. Plans for circulation were not announced, but International Daily News probably will be restricted to Italy, while the Daily American will circulate elsewhere in the Mediterranean area, Eastern Europe and the Middle East.

Confidential Banking Service

IN TIMES LIKE THESE YOU OWE YOURSELFA CONFIDENTIAL BANK ACCOUNT LIKE THIS.

High interest. No red tape. Sign coupon and send.

You owe yourself all the advantages of a confidential Bank account in Luxembourg. We've just produced a booklet telling you how to get them. The sophisticated advantages of privacy guaranteed by law. Of interest rates (nearly the same rates the biggest banks themselves get). Of minimal tax. And much more. Luxembourg is a safe sovereign state; an EEC member; a major financial centre. Canadian American Bank is part of Northwest Bancorporation, America's 18th largest Bank holding company. Our booklet "Confidential Banking" is of inestimable value. It comes with a complete account opening form. Send for it.

■ Confidentiality and Tax Advantages ■ Full choice of Banking Services for the private investor. An experienced and personally responsible officer for

each account. Simple opening procedure. Sign the coupon and send it today. It's a money-making move.

Please send, in confidence, your booklet "Confidential Banking Services."

OAU Condemns U.S. Policies on South Africa prehensive and mandatory eco- intended to be a routine budgetary the sad episode that has befallen

ADDIS ABABA, Ethiopia The Organization of African Unity accused the United States on Sunday of encouraging South Africa to stall on changing its racial segre-gation policies and on giving inde-pendence to South-West Africa (Namibia).

The charge was contained in re-

solutions on South Africa and Namibia passed at the end of a weeklong foreign ministers' meer-ing highlighted by a dispute over the surprise admission of the Polisario Front, the guerrilla group fighting Morocco for control of the Western Sahara, as the organization's 51st member.

The continuing political, economic and military collaboration of certain Western countries, particularly the United States, with the racist regime of South Africa, has served to encourage its persistent intransigence and defiance of the international community," the OAU ministers said.

majority rule. Though not citing the United States by name, the resolution on

Boycotting Qadhafi's Oil

An American boycott of Libyan oil is an important gesture. But it is necessary to recognize that, in present circumstances, it is no more than a gesture. The Reagan administration ought to proceed only if it is ready to maintain this boycott in times of shortage as well as in the current surplus of oil.

For the present, Libya, still trying to enforce inordinately high prices, will have great difficulty selling its oil regardless of boycotts. Also regardless of boycotts, the United States will have no difficulty at all finding the oil elsewhere to meet its diminished import requirements. But, as everybody ought to undersand by this time, events can reverse the market without warning and suddenly give all the advantages to the sellers. That is no reason to abandon the plan for a boycott. But Americans need to be aware that the boycott will not necessarily continue to be as costless and easy as it now appears.

Libya is the rare case in which economic sanctions are clearly worth invoking. Often, economic sanctions are poor weapons - ineffectual, injuring innocent bystanders more gravely than the politicians and policies that are the targets. But, in this case, the general population - a small population, in a country with great wealth — is not going to suffer from the boycott. Neither is any other country likely to be affected. The purpose here would not be to starve Libya or use economic

duress as a means of punishing it for the reckless and violent forays abroad that have characterized Col. Moamer Qadhafi's rule.

The point of the exercise is the expression of moral disapproval, in the Wilsonian tradition. Because Col. Qadhafi has used the enormous Libyan oil revenues to finance assassination squads throughout Europe and in the United States, and to build up his armed forces to threaten his unfortunate neighbors in Africa, the United States is well justified in ending its inadvertent contributions to those depredations. If others wish to buy the oil, knowing how the revenues will be used, that is their affair - although it might be noted that the Europeans have been reducing their imports of Libyan oil significantly.

No doubt the Libyans can find other customers, if they choose to cut their prices further. No doubt they can find engineers and technicians to run their oil fields in place of the Americans who have been withdrawn. America is not trying to snuff out their economy. It is simply declaring that Libya, under Qadhafi, has placed itself beyond the pale, and it now proposes to deliver that message by isolating Libya. The United States broke diplomatic relations some time ago, but in the Libyan case it is the commercial relations that count. The right response is the refusal to buy from them.

THE WASHINGTON POST.

The Disbelieved Believer

Every day, it seems, President Reagan loses another ally in his budget battle with Congress. He alone remains a true believer. unshakable in his faith that a healthy recovery can occur and be sustained for years despite huge and unyielding federal deficits. Inflation has come down dramatically and the president believes interest rates will follow: If only the nation will trust Reaganomics long enough to work, it will celebrate the vital new era promised a year ago.

Never mind that the knowledgeable Sen. Ernest Hollings greeted the president's 1983 budget with a radical alternative. The South Carolinian is a Democrat. But then came the defection of Sen. Howard Baker, the majority leader, and he in turn urged the nation's corporate leaders to confront Reagan with their alarm about his deficits.

. That is what the hardly radical Mobil Oil Corp. has done. It pleaded for a reduction of the deficits because they contain "the seeds for renewed excessive inflation, retarded economic growth and continued high interest rates." And now comes Sen. Pete Domenici, the Republican star who skillfully shepherded the president's budget to passage last year, insisting on a rewrite this year - with or without the president's help.

It is thus inevitable that the Reagan budget will de drastically revised. But it is ov means certain that Congress by itself will come up with the best remedies.

Virtually all the suggestions heard so far are improvements. All would shrink deficits more decisively and fairly than the president's plans. But by concentrating on a delay or reduction in the income tax benefits due this July and next, they not only offend the president's proudest achievement but overlook more promising sources of revenue.

There is available a "supply-side" strategy that might yet appeal to Reagan. It would let

stand the incentives provided by the multiyear reduction in tax rates, which are expected to encourage some taxpayers to be more productive. The revenues that Congress draws from the economy should be in the form of taxes that discourage consumption, not production. A federal tax on gasoline or a fee on imported oil, for example, would yield both revenue and beneficial energy savings. A value added tax - basically a federal sales tax — could be imposed as the recession ends to raise revenue and discourage consumption directly. Some tax subsidies, like the deductions allowed for interest on consumer loans, should be withdrawn.

Why does the president stand so rigid against the clamor? Perhaps he is a secret Keynesian, wanting huge deficits to stimulate fast recovery from recession. Perhaps he thinks the recession gives him time to change course next year, after he is through squeezing expenditures on programs he resents.

But in considering tax increases, the country ought to be alert to a crucial difference between urgency and immediacy.

There is indeed no need to raise taxes immediately. No one urges a course that would only prolong and deepen the recession. There is, however, a need to act against future deficits urgently, to demonstrate that they will be declining, not rising, in the years of recovery Until that is clear and credible, the financial markets will continue to roil in uncertainty, interest rates will stay high and even the recovery may be aborted.

Does the president really intend to stand idly by while economic policy is reconstructed all around him? His rigidity, or strategy of delay, is now an enemy of recovery and also of the most prudent repair of his budget. A useful economic strategy needs more than a single true believer.

THE NEW YORK TIMES.

On the Japanese Sense of Grievance

VV no businessman is as fa-miliar with both the United States and Japan as Akio Morita, chairman of the Sony Corporation. Therefore, when Morita told a small group of influential American and Japanese opinion-makers in Washington the other day that Japan resents American "high-handedness," they all sat

up and paid attention. He conceded that "fair criticism" could be made of Japanese (ailure to abandon import quotas on tobacco and other agricultural products, and certain annoying non-tariff customs and other barriers. But he warned that the persistent pressure from the

ing oppressive.

"Instead of treating Japan as a friend, the United States and Fu-rope are ganging up on Japan," he said, and are "treating [us] al-

Those are tough words, reflecting a bitter assessment in Japan that it is taking a bum rap for the inability of American industry to compete. But there is equal bitterness in America, the extent of which the Japanese have been slow to appreciate.

Build a Better Mousetrap and the World \dots

By Hobart Rowen

United States to "make more concessions' so as to reduce the Japanese trade surplus is becom-

most as an enemy."

Yale's Prof. Hugh Patrick,

commenting on a round of talks with U.S. congressional leaders, said the other day: "When the friendlies are as unfriendly as they are, you have to worry about the 'unfriendlies.' There is increasing frustration, and it will get worse instead of better." The bilateral trade deficit for

the United States could hit \$25 billion this year. Never mind that comparing bilateral trade balances can give a distorted view of world economic relationships. The United States, for example, has a sizable bilateral surplus with Europe, and surely would resist European demands that it make "concessions" to reduce the surplus.

And never mind that the United States enjoys a huge world-wide surplus on its sales of ser-vices — \$36 billion in 1980 while Japan had a services deficit of \$11.3 billion. The bard political fact is that there is a high visibility to the trade imbalance, and that it gets translated into "lost" iobs (as in the auto industry) and ultimately into pressure on Con-gress to "do something."

Reciprocity?

The buzzword on Capitol Hill today is "reciprocity" (bilateral reciprocity, that is), a principle according to which the U.S. government should take steps to assure that American businesses have the same access to overseas markets that foreign firms enjoy in trading with the United States. Using this device to limit Japanese imports would run counter to the traditional American reliance on the "most favored nation" principles, according to which a nation must treat all others equally in its market.
But the administration's two

chief trade policy-makers, Am-bassador Bill Brock and Com-merce Secretary Malcolm Baldrige, are willing to use the con-gressional drive for reciprocity as a lever to force Japan to open its markets further, even though it

threatens U.S. commitment to

10 years since the Union

multilateral trade principles. Baldrige, worried that American high-technology industries which used to excel are losing their competitive edge, is ready to twist Japanese arms on the idea of reciprocity.

He claims that Japanese pro-

ducers have picked up 70 percent of the market for the 64K RAMs, a state-of-the-art microchip memory, by slashing prices "to the point where they are driving the United States out of the market.

It is doubtful that Baldrige can back up that claim, Edson Spencer, chairman of Honeywell, Inc., one of the major buyers of 64K RAMs, suggests that the Japanese have taken the lead in this microchip not because of price but because "the Ameri-cans got there late." Spencer says Honeywell has three suppliers of 64K RAMs, all Japanese, because American producers do not yet have 64K RAMs for sale.

The danger is that the frustrated American response to the Japanese success - in these new fields as well as autos and consumer electronics — will be to drift into "reciprocity" legisla-tion as a painful necessity, denying at the same time that it is protectionism by another name.

It will take a great deal of effort on the part of both Japan and the United States, the two economic giants of the free world, to defeat the internal forces for protectionism within

each country.
Japan could allay some of the American bitterness by contrib-uting more funds to worldwide economic development, and also by picking up a greater share of its own defense costs. The United States, for its part, will have to be more honest about its own shortcomings, modernize the economy, stress productivity, and reborrow the labor-manage-

Policy Premises Three and a Half Decades Old

TEW YORK — The premises of U.S. foreign policy have not changed since the late 1940s. They were that the United States had global interests that required the defense and cooperation of Western Europe, and that its major rival was the Soviet Union, at first in Europe and later practically everywhere. The 1945 Yalta agreement provided for free

elections in Poland, Romania, Hungary and Bulgaria, as well as for withdrawal of the Red Army from Czechoslovakia. But it did accept Moscow's right to insist that these countries on the Soviet Union's western borders should not have hostile governments.

In fact, Stalin methodically violated the pact, and Yalta came to symbolize the parti-tion of Europe at the north-south line dividing Germany. That was essentially accepted by the spite a lot of mutual recrimination.

While there have been wars on other continents and sometimes bloody upheavals in Eastern Europe, the arrangement kept the peace in Europe and underlay America's policy Soviets: so far, but no farther.

The Marshall Plan, NATO and other alliances stemmed from this analysis of the world the United States faced. Meanwhile, the United States supported and was sometimes actively involved in the liquidation of Europe's colonial empires, in part to express traditional American regard for independence and self-de-termination of peoples, in part to resist Communist pre-emption of the liberation cause. Now, nearly 40 years later, decisions made after the war remain the fundamental guideBy Flora Lewis

But the world has changed drastically. The Soviet Union has become a nuclear superpower with global reach. Western Europe has fully recovered, although it is still too divided to act as a coherent power. China's alliance with Moscow has turned to hostility. Decolonization is completed, and the world is burgeoning with poor countries which have found that independence is not enough, and which in some cases are growing frustrated to the point of explosion.

New Generations

With ups and downs, the postwar policy worked, but it is running out now. New genera-tions have grown, and they no longer take for granted the assumptions passed on to them. In Europe, people no longer accept the post-Yalta partition as inevitable and permanent. Germans may no longer intone reunification as a credo, but neither do they accept as endurtwo hostile states. This is reflected in the West German complaint of lack of "identity."

While Moscow fiercely denounces any challenge to "the results of World War II," its euphemism for its European empire, there has been a striking advance toward German-Soviet reconciliation. This showed when Leonid Brezhnev, visiting Bonn last November, paid tribute to "our two peoples' will for peace" because "our two peoples suffered most in World War II," omitting familiar diatribes about Nazis aggression revanchism

Poland has been the latest and one of the

suppress active opposition for a time, but it cannot ease any of Poland's economic and social problems, and resistance, perhaps more vi-

of Europe won't work any more and it's no longer in their interest to impose it."

So it is time for a sweeping new look at the premises of foreign policy. Can a safer way be found to cohabit Earth with the Soviets? Can America support the European urge to relax the continental and German division? Can it insulate unavoidable conflicts in the Third World, which has its own intense demands, from the dangerous East-West struggle? Can it accommodate change, not always to its liking but often beyond its ability to prevent?

These questions address an immense tangle of risks and opportunities. They raise fears that crease Moscow's influence on West Germany and break up the Western alliance, without reducing Soviet dominion in the East. The Soviets, internally weak, are seen as irresistible except by force.

answers are not necessarily so anymore. There is a profound lack of confidence in the West's own strength and stamina, which seems to block a new analysis. It must be made if we are not to stumble into disaster unaware.

For a Central American Strategy

Vietnam is across the Pacific from the United States but El Salvador is on its doorstep, and no one will seriously deny that the United States has an important interest in the Central American area, especially in view of the question mark attaching to Cuba's subversion and Cuban arms supplies in the region. However, applying a "domino theory" to the problem of El Salvador should not stampede Washington into using a sledgehammer to crack a nut. What the United

1907: Flying Machine Breaks Up

PARIS — At Vincennes, the Delagrange flying

machine made its bow to the public and -

broke its neck. Some 200 persons witnessed the

trial, including the celebrated aeronaut M. San-

tos Dumont and Mr. Archdeacon. It took an

hour and a half to put the last touches to the

apparatus. Then M. Voisin took his seat in the

car, the motor was set in motion and the ma-

chine ran along the ground for some 20 meters

against a light breeze. As soon as the wheels

left the ground the forepart rose perpendicular-

ly, the propeller touched the soil and the appara-

tus broke in two pieces. The Delagrange aero-plane weighs 290 kilograms and carries a 40-50

horsepower Antoinette motor.

States urgently needs is a comprehensive Central American strategy. - From the Neue Zurcher Zeitung (Zurich).

A Court Ruling to Spare the Rod

More than three centuries have passed since Samuel Butler penned that famous line, Then spare the rod, and spoil the child," which was to give such strong moral comfort to generations of disciplinarians and even stronger physical discomfort to generations of children. The European Court ruling that Britain's teachers must no longer beat pupils against the wishes of their parents (one can safely assume it is always against the wishes of the children) is simply another milestone on the road along which, for better or for worse, humanity and the rights of the individual have long marched.

As regards caning in schools, [the ruling] surely marks the fast-approaching end of that practice. The alternatives are either to have separate schools for caning and noncaning or to have in the same classroom some unruly pupils able to flourish parental objections when called to book, and others forced to face the consequences of being without such dispensations. Either solution is a patent absurdity.

- From the Sunday Telegraph (London).

1932: Hitler Denounces Republic

BERLIN - Stormily cheered by a crowd of

15,000, Adolf Hitler, naturalized German citi-

zen, leader of the Nazis and opponent of Presi-

dent von Hindenburg in the national election,

gave the keynote of his campaign with a sharp

attack upon the republican system, postwar poli-

cy and the Versailles treaty. "This is not only a

presidential campaign, but also a fight to over-

throw the system established on Nov. 9, 1918,"

he declared, "Whoever believes he can humble

us through threats errs. Enemies may threaten

us and whip us, but we'll see who holds the

whip at the end of this campaign." The 13 years of the "policy of fulfillment" had left

Germany a heap of ruins, he said.

With respect, I would suggest

Although events in Iran have

lines of American policy.

slipped from the front pages of Western newspapers, the slide toward chaos there continues. The revolution, which was an enormous outpouring of popular frustration and resentment against the shah, has been transformed into an even worse dictatorship that mas-querades in the guise of Islam.

I participated in the revolution, and I supported its goals, as governor of Azerbaijan province, until I was dismissed by the Khomeini I grieved for the thousands of

unknown soldiers who shed blood to make the revolution a reality. But now those who claim to be its guardians have become its manipulators. Through corruption, ig-norance, avarice and brutality, they are dissipating the national wealth, destroying the fabric of our national life and trampling on the most basic human rights.

From time to time, an Iranian group announces that it has formed "the opposition" to liberate the country. In truth, so far there is no opposition, no unity of purpose that rises above sectarian differences. Such unity is necessary, both inside Iran and in the free world, which must understand that those who, rule in Tehran represent neither Islam nor Iran.

Ramatoliah MOGHADAM-M.

Somali Confusion

The report (IHT, Feb. 12) of an alleged army mutiny in northern Somalia could well cause confusion. That is the main purpose of Somali dissident groups who are paid with Libyan money and directed, from afar, by the Kremlin. Somalia lies in the "arc of crisis" that has been strategically recognized by the United States through its creation of the Rapid Deployment Force. The aim of these disloyal Somalis is to disrupt the U.S.-Somali agreement for the use of Berbera as a facilities post for that force, and in so doing to weaken the string of defensive measures that the White House is

taking for mutual benefit.

that the good faith of information emanating from such sources be carefully checked. LOUIS FITZGIBBON. Havant, England

Camp David Terms

Will the real Camp David please stand. Those Mubarak-PLO formulae that the editorial writer (IHT, Feb. 6-7) supports were most intelligently excluded from the final Camp David peace agree-ments in order to permit fruitful and mutually accepted terms.

And for good reason: Such mag-ic phrases as "self-determination" and "national entity" are the PLO euphemisms for obliteration of Israel as a state. If that is the shape of the future Middle East "peac that the writer supports, let him say so directly.

MOSHE-ben-ZVI.

Hoofddorp, Netherlands.

Haig in Bucharest

In support of Leopold Unger's excellent article (IHT, Feb. 18), I confirm that Mr. Haig came to Bucharest at a time when the regime was strengthening its dictatorship. Decree No. 400 published last Dec. 29 (copy enclosed) provides prison terms of from three months to 20 years, with partial confiscation of private property, for workers who do not strictly comply with disciplinary rules imposed in Romanian factories. A census of domestic animals is under way to oblige peasants to deliver more meat and poultry to the state.

MICHEL KORNE. Ville d'Avray, France.

Mean, Generous

In the editorial "The State of the Union" (IHT, Jan. 28), "recently rich" Texas is said to be mean to the poor. Might this be hesitancy to drag the nonproducers up at the expense of those who manage to make ends meet? And who is responsible for a family of four that cannot support itself?

"It would be grotesque," the editorial says, "to invite these states with a tradition of social conscience to take disproportionate burdens of the nation's poverty as helpless people fled to them from the penury of the less generous."

"What's the use?" and give up.

DAN McGILL.

Tweed and Garbage

But if a state wants to be generous

to the "helpless," it should accept responsibility for the influx of per-

sons who would rather search for a

free lunch than a decent job. The

country's belief in encouraging the

"helpless" at the expense of discouraging producers and hard

workers must stop, or a greater

In reference to the articles by Anthony Lewis and Henry Rosovsky on American higher education (IHT, Feb. 17): The humanities are treated inhumanly, yes, and the situation will get much worse as Reagan vivisects universities by cutting federal aid, and tweedy academics mumble impotently on-ward about "preserving the West-ern tradition" while they rearrange deck chairs on board their sinking Titanic. The facts are that students are being annihilated by rocketing tuitions, and that the average salary of an American university prolessor is less than that of a New York City garbage collector.

Regarding the column by Anthony Lewis and Herbert Denton's ar-ticle ("Reagan's '83 Budget Called

Unfair to Children") in the same issue: As a writer of youth stories who supported Ronald Reagan for president, I have just had a rude setback. My literary agent writes from New York to say: "The juve-nile and youth book market is having great trouble at this time owing to withdrawal of funds for school and public libraries. It should be understandable that publishers may reject your works despite lik-ing them." He suggested that I might look around for something else to do until authors and publishers, not to mention the kids, get better times.
ROBERT L. HARTZELL.

Pope John Paul II with Jesuit leaders at the Vatican, including, from left, Superior General Pedro Arrupe, the Rev. Paolo Dezza and the Rev. Giuseppe Pittau, the aide to Father Dezza.

Pope Promises End to His Rule of Jesuits

By Henry Kamm New York Times Service

Control of the second

ROME - Sternly calling the Society of Jesus to strict obedience to his authority, Pope John Paul II nonetheless has taken the first step to end his direct rule over the embattled Jesuit order.

In a dramatic audience Saturday with more than 100 top Jesuit leaders and provincial superiors from all over the world, the pope announced a general congregation of the order would be called before the end of the year to elect a successor to the ailing superior general, the Rev. Pedro Ar-

In October, the pope, displeased with many Jesuits' advocacy of the most knoral interpreta-tion of the decisions of the Second Varican Council and their activism in social causes, had named an 80-year-old Italian Jesuit as his special delegate to run the order.

In doing so, he overruled Father Arrupe, who. after having a stroke in August, had appointed an American Jesuit, the Rev. Vincent O'Keefe, to function as vicar until a new superior general

Preparation for Election

Jesuit sources said a congregation to elect a successor required at least six months' preparation, and they did not expect the return to normal lead-ership to come before the middle of next year. But many who were interviewed at their Rome headquarters after meeting with the pope expressed relief at Saturday's developments.

Before the papal audience. Jesuits had expressed concern that the pope would indefinitely continue the rule by his delegate, the Rev. Paolo Dezza, and would severely criticize the order's performance under Father Arrupe.

Although these fears were allayed Saturday, John Paul was stern and pointed in telling the Jesuits what he expected of them. He reminded them that they were required to make a pledge of

special loyalty to the pope.

The pope went on to extend this need for loyalty not only to himself but to all the bishops. Rebellious Jesuits have often had strained relations

with bishops in whose dioceses they served. Without directly citing differences in interpretation of the decisions of the Second Vatican

By John Vinocur

Council of 1962-65, which he interprets more con-

servatively than do most Jesuits, John Paul strongly presented his own view. He emphasized that the council's decisions are

to be carried out "not according to personal criteria or psychosociological theories. There is no more room for deviations certainly harmful to the vitality of the religious communities and the church as a whole," he said.

The pope warned the Jesnits that the church's concern for social justice must be exercised in keeping with their priestly vocation.

"This character must be even more emphasized oday against multiform tendencies to secularize the priest's service and to reduce it to a function that is purely philanthropic," he said. "His service is not that of the physician, the social worker, the politician or the trade unionist. They must not take the place of laymen and even less neglect the task which is specifically theirs."

Reading his 18-page text — starting in Italian, then in French, then in English — the pope reserved the announcement of his decision to allow an election of a new superior general for his peroration in Spanish.

As the Jesuits filed out of the audience, they spoke with satisfaction of the things that the pope had not said. They noted the critical statements had not been directed to the Jesuits specifically but had been put in general terms.

They noted the pope had spoken with warmth of their superior general a Basque who enjoys deep affection within the order, and had aded him as "Carissimo Padre Arrupe."

The conciliatory spirit was foreshadowed Saturday morning when Father Arrupe and the provincial superiors jointly said Mass in the Jesuits'

In a homily he introduced and then had read on his behalf, the superior general praised the "full and filial obedience" with which the so iety had obeyed the pope's special measures. He urged them to accept the measures not only with obedi-

ence but also with joy. Asked whether this meant the Jesuits had "surrendered," a leading member of the order replied with a broad smile, "Don't you believe it!"

In War of Nerves, Lebanon Braces Against Israeli Threat

New York Times Service TYRE Lebanon - The head-

quarters on the "western front" is sandbagged basement of a bombed-out house and a nearby tent on a concrete slab. They are on the edge of this ancient port in an alley off a side street of houses. flattened during the last round of fighting in southern Lebanon.

We expect the attack at any time, from minute to minute," said the Palestinian guerrilla commander, who operates under the name of Col. Asmeh. "We are ready to die lighting or to win, for there is nothing at our backs but the sea."

Carefully, the colonel, a former Jordanian Army officer, went over a map. He pointed out the villages in the enclave on the Israeli-Lebanese border controlled by breaka-way Lebanese Army Maj. Saad Haddad. He noted where there were buildups of Israeli troops and

Nearly every day, for more than a month now, there has been a tough warning from one high-ranking Israeli official or another that any provocation from the ns will bring a swift invasion to clean out the guerrilla bases in southern Lebanon. Moshe Arens, Israel's new ambassador to the United States, recently said of Israeli military action: "I would almost say it's a matter of time."

The Reagan administration has sent in its special Middle East envoy, Philip C. Habib, to try to shore up the cease-fire he helped arrange in July. Meanwhile, the United Nations voted to add another 1,000 troops to the 6,000-man force that tries to keep apart what are dryly described as "de facto forces" — Maj. Haddad's Israeli-backed militia — and "armed elements" — Palestinian guerrillas and Lebanese leftists.

War of Nerves

Invasion jitters are hardly new to Lebanon, the killing ground for so many Middle East disputes. They have been another unpleasant fact of life since the Israelis last invaded and pushed up to the Litani River in 1978. It is possible the current Israeli threats are in reality part of a war of nerves to keep the Arabs off balance and to wring some concessions from the Americans in exchange for good behavior.

But the threats - and reports by UN observers of Israeli troop movements along the border and in "Haddad land" — are being taken with considerable seriousness. There is a growing feeling that an invasion is all but inevita-ble and that the fighting is likely to

be big and bloody.

Mr. Habib flew into Beirut Friday. He is generally held in reserve and launched only when the State Department thinks the Israelis are about to do something rash. Unit-ed Nations officials have also been trying to put pressure on the various combatants. Palestinian guer-rilla chief Yasser Arafat, UN sources say, has promised to control his men, but fringe elements could always strike out on their

One factor that keeps pushing toward a showdown is that, quite simply, the Palestinians are getting stronger and the Israelis are un-likely to tolerate this. While observers here discount reports of an extensive military buildup, it is clear the guerrillas have been strengthening their positions and bringing in new weapons, includ-ing heavy artillery and mobile truck-mounted Grad rockets, used so effectively last July. However, the gnerrillas are far from ready to challenge the Israelis in conven-tional military terms. They are seriously lacking in effective anti-aircraft weapons, military sources

southern Lebanon and their Amal (Hope) militia. Although nominalv allied with the left, the Shiites have clashed repeatedly with Palestinian guerrillas and Lebanese leftists in the south. The Amal organization is believed to be badly fragmented and infiltrated by several of the factions and outside in-

terests that keep armed politics boiling in Lebanon.

will be the role of the Shiite Shiites resent the continued Pales-Moslem community native to tinian presence fearing the guerrillas will be permanently implanted on their land. Israeli bombing and shellings have also turned some Shiites against the Palestinians, as they were doubtless meant to do.

Maj. Haddad's militia, once mainly Christian, is now believed to contain as much as 40 percent Shiites. Syria has also been sup-porting Shiite elements, possibly with the aim of using them to keep Mr. Arafat's guerrillas in line. In

the event of an Israeli invasion. some Shiite militiamen could conceivably fight behind the lines against the Palestinians and cut their supply and communication lines.

For the moment, diplomats in Beirut and guerrilla leaders feel Mr. Habib's tour and a visit to Israel later this week by French President François Mitterrand will keep the lid on. But for many, the question remains not whether, but when.

Israel Insists Mubarak Visit Include Jerusalem

By William Claiborne

Washington Post Service JERUSALEM — The Israeli government warned President Hosni Mubarak of Egypt Sunday that if he refuses to include Jerusalem in his planned visit to Israel, the visit will be canceled.

The warning was contained in a statement approved by Prime Min-ister Menachem Begin and his Cabinet after Foreign Minister Yitzhak Shamir briefed the ministers on his visit last week to Cairo. Mr. Shamir met with the Egyptian leader during the visit.

The condition threw into doubt whether Mr. Mubarak, who has repeatedly refused to commit himself to a specific date for his first

Suspect's Brother Shifts Stance in U.S. Death of Turk

Los Angeles Times Service
LOS ANGELES — The brother of Hanpig Sassounian, who is accused of having killed the Turkish consul general here, has evi-dently contradicted his earlier statements that the suspect was home watching television when the diplomat, Kemal Arikan, was

In a court affidavit filed here last week, police said that Harout Sassounian, 21, told FBI agents that his brother, Hanpig, 19, and a person identified as Koko arrived at the Sassounian home in Pasadena at about 10:20 a.m. on Jan. 28, the day of the killing.

The assassination occurred at 9:56 a.m. in an area of Los Angeles at least a 25-minute drive from the Sassounian residence. In an interview Jan. 29, Harout and his father, Maroug, 51, told a reporter that Hanpig slept late the day of the killing and was at home at 10:05 а.т. Hanpig Sassounian was arrested

the day of the shooting, but the other suspect, Krikor "Koko" Saliba, 21, remains a fugitive. Harout Sassounian was arrested last week on charges arising from a 1980 firebombing that charred a garage at Mr. Arikan's house. The shooting was claimed by the so-called Justice Commandos of

the Armenian Genocide.

visit to Israel, would come at all. to visit Jerusalem, he should stay Israeli officials had first mentioned away. But, an official said, "There mid-February for the visit, but recently have talked about "somematic channels.

time in March."
The Cabinet statement, read to reporters by Cabinet secretary Aryen Naor, said, "Il Presiden Mubarak refuses to include Jerusalem during the course of his visit to Israel, we would have to do without this important visit."

Jerusalem Not Ruled Out Mr. Naor would not say whether Mr. Begin or Mr. Shamir had been advised by the Egyptians that Mr. Mubarak would not come to

ernment said the Egyptians "have said they would prefer to come to other places, but they have never said they would not come to The source said that Mr. Mu-barak made it clear during his talks in Cairo that he would prefer a working visit, as opposed to an official state visit, and that he

Sinai Militants Block Roads

KEREM SHALOM, Sinai Border (WP) - Frustrated in their attempts to demonstrate at border roadblocks erected by the Israeli Army, militant settlers in the northern Sinai Peninsula set up their own barricade Sunday out-side the town of Yamit, while hundreds of supporters protested outside Israel's parliament, the Knes-

The army tightened its control over approaches to the Sinai, posi-tioning scores of troops at five roadblocks and erecting elaborate barricades of concerting wire and road nails. Additional checkpoints were positioned on both sides of the main roadblocks to screen out demonstrators attempting to reach

the border.
Just outside Yamit, hundreds of members of the Stop the Sinai Withdrawal Movement blocked the main highway with cars and tractors, and checked the identification of passing motorists. Moshe Meir, a spokesman, said supporters who have volunteered to repopulate abandoned neighborhoods in the Sinai would be brought in through the desert, around the

Egypt to Charge 1,000 With Plot

New York Times Service CAIRO — The Egyptian state security prosecutor will announce three separate indictments against about 1,000 people in the coming month, on charges of trying to overthrow the Egyptian government and set up in its place an Iranian-style Islamic regime.

The weekly magazine Al-Mussawar, in a report based on information from senior officials at the Interior Ministry, said that the accused, members of an organization called Jihad (holy war), were behind strife between Christians and Moslems in Cairo last year and the fundamentalist uprising in Asyut shortly after President Anwar Sadat's assassination last October. The group has also been linked to the assassination.

The article, whose contents were

security prosecutor, said Jihad had also planned to assassinate senior government officials and to bomb hrines in well-known mosques.

Theology Professor

The accused have been grouped into three categories, according to the extent of their involvement in Jihad. The first comprises about 200 people said to form the leadership of the organization. The head of Jihad is said to be Omar Abdel Rahman, a professor of theology accused in the Sadat assassination trial of providing the religious sanction for Sadat's murder.

Several other defendants in the trial, including Mohammed Abdel Salaam Farrag, the alleged ideologue of the group, will face charges in the state security court

as well as before the military tribunal trying the Sadat case.

The leadership is accused of

training paramilitary militias and plotting "to create chaos in Egypt, overthrow the ruling regime, and seize power" to form what was to be one of a chain of Islamic republics. Mohammad Salem Rahal, a Jordanian national of Palestinian origin, was said to serve as a link between Jihad and outside organ-

The second group, which includes more than 300 people, is accused of helping to finance Jihad and of forming scouting and reconnaissance teams. The organization reportedly financed its activities through thest and donations given to build mosques. The third and largest group comprises the rank-and-file members of the organization.

Give the folks back home a picture of Europe and save enough on the call to paint the town.

When you're having the most colorful trip of your life, let your family and friends have a "look" right along with you. Give them a call. But first, check out all the money-saving tips below, so you can give Europe's high prices the brush.

Save on surcharges. Many hotels outside the U.S. charge exorbitant surcharge fees on international calls. And sometimes the fees are greater than the cost of the call itself. But if your hotel has TELEPLAN, the way to keep hotel surcharges reasonable, go ahead and call. No Teleplan? Read on!

There are other ways to save money. Save with a shortie. In most countries there's no three-minute minimum on selfdialed calls. So if your hotel offers International Dialing from your room, place a short call home and have them call you back.

with dollars, not local currency, when you get your next home or office phone bill.

Save these other ways. Telephone Company Calling Card and collect calls may be placed in many countries. And where they are, the hotel surcharges on such calls are usually low. Or, you can avoid surcharges altogether by calling from the post office or from other telephone centers.

Save nights & weekends. Always check to see whether the country you're in has lower rates at night and on weekends. Usually the savings are considerable. Now And you pay for the callback from the States you have the whole picture.

Analysts Challenge Alternative U.S. Budgets

By John M. Berry

WASHINGTON - In the upside-down economic world of 1982. Democrats and Republicans are vying with one another in the midst of a recession to reduce the size of the federal budget deficit. if they are successful, the tighter

fiscal policy would: taken alone, likely mean an even more depressed economy.

During previous recessions, most members of both political parties rushed in the other direction, cobbling packages of spending programs and tax cuts that were supposed to stimulate the

Now, Sen. Ernest F. Hollings, Democrat of South Carolina, is urging Congress to adopt a \$115 billion set of tax increases and spending cuts that would chop the 1983 deficit to less than half the evel proposed by President

Sen. Pete V. Domenici, Republican of New Mexico, chairman of the Senate Budget Committee, this week offered a different and somewhat less austere scheme, but it, too, calls for a drastic tightening of

fiscal policy.
"If we follow the path I have outlined, we can effect a dramatic turnaround in the economy," Mr. Hollings promised when he pre-

Developing Nations

Are Showing Signs

Of Liquidity Squeeze

al Herald Tribune

PARIS — Rapidly declining liquidity of developing countries is fueling new worries about the financial health of the world's poorest nations.

The February issue of the Amex Bank Review notes that developing countries' reserves (foreign exchange, gold and special drawing rights) fell 15 percent last year, equal to the low levels last seen in

1975, reducing the cash in hand needed to finance the

It is generally agreed that, as a great deal of trade is financed on a 90-day basis, reserves ought to total

a minimum of three months' worth of imports. How

ever, the review notes, "these reserves now cover 3.4

SYNDICATED LOANS

months of imports, compared to over four months of

imports in 1980 and the peak of 4.7 months in 1978."

Mexico, for example, had reserves totaling the equivalent of 1.7 months of imports last year, down

from 1.8 months a year earlier and 2.6 months in

1975. Brazil and South Korea both registered 2.9

months of reserves while the Philippines with a ratio

compared to 1975, outnumber countries in a similar

or better position by almost 2-to-1," the report says.

The bank also notes that the bank debt of the so-

called less developed countries last year exceeded their deposits with banks for the first time in the past

Total LDC bank debt at June 1981 is put at \$257.4 billion, of which \$117.8 billion falls due by June

1982. However, the mid-year level of deposits totaled \$109.6 billion. In 1978, by contrast, deposits of \$71

billion were almost half as much again as debts total-

ing \$50 million maturing during that year.

"This does not mean that there is a severe liquidity

crisis as yet," the bank states, "since LDCs can also

"The countries in a worse liquidity position, 1981

smooth flow of imports.

terest rates will go down; and everyone can go back to work."

Well, perhaps not everyone. Miffed at the Hollings initiative, which Treasury Secretary Donald T. Regan called "ridiculous," the administration asked Data Resources Inc., to crank the details through its computer model of the

The results showed that while budget deficits would be much

NEWS ANALYSIS

smaller, interest rates would not be all that much lower and unemployment, in 1985, would be a whopping 10.8 percent. At the same time. inflation would be less than a percentage point lower than in DRI's basic forecast.

While different analysts might quarrel with DRI's specific num-bers, few would challenge the direction of the results: If other policies are unchanged, reducing a budget deficit will reduce the level of economic activity, they say.

To argue to the contrary would require standing modern economic history on its head. Raising taxes by \$1 billion, or reducing govern-ment spending by \$1 billion, means there is \$1 billion less in private hands to be spent or, in some part, saved. Unless private spending goes up by the same \$1 billion, fully offsetting the change in the federal budget, the total demand

for goods and services in the econ- add up to more than \$246 billion

Hollings seems to be that a reduced budget deficit will lead to lower interest rates, which in turn will stimulate private sector spending, particularly for houses and business investment. But no wellknown model of the economy, either Keynesian or monetarist. would show such a fall in interest rates that private spending would go up by nearly as much as the budget deficit goes down.

idget deficit goes down. Thus, predictably, the DRI computer model indicates that the Hollings proposal would mean essentially no recovery from the reyears, if monetary policy is left un-

changed.

What people ought to be talking about is the need for a comned operation, a substantial reduction of the deficit and a somewhat easier monetary policy." Charles L. Schultze, President Carter's chief economic adviser,

The payoff from such a shift in the mix of policies would not nec-essarily be faster economic growth and a more rapid reduction in unemployment, but rather more in-vestment by business and in housing and less consumption by individuals, Mr. Schultze said.

The Reagan administration has argued that the deficits it projects for 1983, 1984 and 1985, which

Thailand and Peru - "as of June, 1981, debts matur-

ing in the current 12 months to June, 1982 exceeded deposits and unused credit facilities combined for these 10 LDCs."

The bank warns that "in the face of international

recession, low commodity prices and high world interest rates, rebuilding reserves will be difficult." The
10 biggest borrowers, however, "should still be able
to add to reserves by borrowing," the bank states.

Bankers generally warn that borrowing this year
will be more difficult and that borrowers will have to

face up to paying more for their loans than the low margins over Libor accorded in recent years. "Borrowers are also going to have learn new nego-

tiating techniques," says one senior loan officer. "Up to now, they have relied on the competition between

ratio had fallen to under half maturing bank debts."

banks overtook the level of their bank deposits.

meet liquidity needs.

Korea, the Philippi

will not hurt business investment The explicit assumption by Sen. and that the depressed housing in-ollings seems to be that a re-dustry will lead this year's recovery. A surge in saving will allow financing of the deficits, more private sector investment and declining interest rates, the administration claims. But since the Reagan budget and economic forecast was published this month, a wide range of private economists - Republican and Democratic, conservative and liberal - have questioned whether such a rosy outcome is likely.

Ernest F. Hollings ...Sees 'dramatic turnaround

they want a smaller deficit along with a somewhat different pattern for federal spending, including smaller increases for de-

has been focused on the size of the deficit and its link to interest rates rather than on the equally important role of monetary policy.

To sort all this out, economist Rudy Penner of the American Enterprise Institute suggests that, to start, policy-makers should decide what rate of growth of nominal (Continued on Page 9, Col. 4)

However, there was no indication as to what action may be tak-

Mr. Suzuki made the pledge Saturday after conferring with Masumi Esaki, former minister of international trade and industry, who had just returned from leading a trade mission to Washington, where he met President Reagan and Secretary of Commerce Mal-

He told Mr. Suzuki that the U.S. attitude toward Japan on the trade issue was "stern" and urged him to act promptly to cope with growing U.S. congressional moves for "re-ciprocity" legislation primarily legislation pri aimed at Japan, according to a report in the newspaper Asahi Shim-

Mr. Baldrige had said in Wash-ington Friday that "time is running out" for the Japanese to make its markets more open to Ameri-can goods and reduce the growing trade deficit between the two na-

Deficit Likely to Rise

He said he was not issuing an ultimatum to the Japanese to lift trade barriers to American goods. But he described the trade problem between the two nations as

very serious."

If the trade barriers were eliminated, he said, U.S. exporters could be doing as much as \$8 bil-lion to \$15 billion more business at

the end of five years. The United States imported \$18 billion more in goods from Japan last year than it shipped there, and that deficit likely will rise to \$20 billion this year, government offi-cials have said.

Mr. Baldrige said the Reagan administration would like to avoid retaliatory trade measures, but could be forced in that direction unless Japan opened its markets to

American goods.

He described the measures Ja-

maining \$75 million was sold last fore too early to judge the market's By Carl Gewirtz

PARIS --- The Eurobond market came alive last week, with some \$1.2 billion of new issues launched in the wake of a near \$3-billion decline in the U.S. money supply the week before and a continual easing in the cost of overnight money. Issuers did well to move as fast as they did. By the end of the week conditions had changed. By midweek, the cost of over-night funds started moving up

EUROBONDS

from what many analysts had regarded as unnaturally low levels and late Friday the Federal Reserve delivered the ultimate blow, reporting a \$1.2-billion increase in the money supply when most fore-casts had called for a continued decline or, at worst, no growth.

The rate on overnight money.

the federal funds rate, which is regarded as the handiest measure of the Fed's permissiveness or re-straint, traded as high as 14% percent in New York on Friday, up from 13 percent on Thursday and 12 percent Wednesday, New York closed with dealers forecasting an opening rate Monday of 141/2 per-

At best, the Fed is expected to maintain conditions, tolerating no further easing in rates but not squeezing them higher either. At worst, of course, is the fear that the Fed will tighten up as the M-1 measure of the money supply is growing faster than the Fed has targeted and as the corporate demand for bank loans is quite high, indicating perhaps that the worst of the recession is over.

This is bad news for the Eurobond market, where most of the new issues announced last week were pre-priced with terms that anticipated a further fall in interest

Japan's Lead in 256K Chips Forces Some U.S. Firms Out of the Race

By Andrew Pollack New York Times Sernce

NEW YORK - Since the age of the transistor dawned at Bell Lab-oratories in 1947, the United States has dominated what is now the \$13-billion global semiconduc-In a business where prowess and

profits have been measured by the ability to squeeze more and more electronic circuitry into less and less space, companies like Texas Instruments, Intel and Motorola have raced to outdo one another, sometimes trumpeting each new advance well before it was ready

The industry is now developing yet another promising product that will appear on the market in a year or two. Known in industry lance as the 256K dynamic RAM (for random access memory), it is a silicon memory chip smaller than a postage stamp yet capable of stor-ing all the words on a page of this

But instead of boasting, some semiconductor industry executives are saying their companies might not compete in the new market. Even before the battle over the new product starts, some U.S. companies are conceding the market to the Japanese.

'I think we've already lost out in the 256K," said W. J. Sanders 3d, chairman and president of Advanced Micro Devices of Sunnyvale, Calif. "The Japanese have won the dynamic RAM market."
Last year, the world's semiconductor industry sold 8 million 64K RAMs, the immediate predecessor of the 256K RAM, and that number is expected to muchan to

ber is expected to mushroom to more than 700 million by 1985, making the 64K RAM the first product to bring in more than \$1 billion in annual revenues. The 256K RAM, if past precedent is followed, will be an even bigger moneymaker.

But not all U.S. companies are Mr. Esaki urged the premier to opting out. Some, such as Motoro-la and National Semiconductor, launch a more active public rela-tions campaign in the United and American Telephone & Telegraph Co. will produce the 256K.

There are also many other new

States to promote mutual understanding between the two countries, Kyodo news service said. products and opportunities in the industry and U.S. companies still Leo Tindemans, Belgian foreign minister and president of the Euroaccount for two-thirds of the world pean Economic Community Counmarket. The mere fact that semicil of Ministers, arrived Saturday conductors are the heart of the exm Tokyo for a four-day official ploding computer and telecomvisit that is expected to concen-trate on trade tensions between the munications industries almost assures growth and profits for the EEC and Japan. He was due to

Nevertheless, there is a wide-spread feeling that the Japanese meet Mr. Suzuki Monday. Japan's trade surplus with the EEC reached \$10.3 billion last will dominate the dynamic RAM

Japan Finds Success Poses Problems New York Times Service TOKYO - Success has its own problems. Thus, Japan's major semi-

conductor producers are trying to figure out how fast to push ahead with

the next generation 256K RAM dynamic chip. "If the Japanese companies go too aggressively into the 256K, the 64K market will collapse," said Hisamichi Sawa, director of Bache Hasey

Stuart Shields in Japan. Reports of plans by the industry's big three - Nippon Electric, Hitachi and Fujitsu - have appeared in the Japanese press saying that they will start producing up to 70,000 chips a month by late this year or in early 1983, and that new factories are being built specifically for the

production of 256K RAMs. In fact, the new production facilities are for what is called "very large-scale integration" — 64K RAMs and larger — but not specifically for 256K RAMs. Articles about production quantities and timetables are mostly speculative, say Japanese sources.

Even if the Jananese do not analysts say, prices — and the indus-try's profits — will come under imense pressure.

U.S. companies are thinking of teaming up to fight the Japanese. Just recently, top executives of sev-eral semiconductor companies and of large computer companies met quietly in Orlando, Fla., at the in-vitation of Control Data Corp., to discuss forming a joint venture for research and development with up to \$100 million in annual funding.

Such dismay is in large part motivated by the stunning victory the Japanese have won in the market for the 64K RAM. The Japanese, led by Hitachi, Fujitsu and Nippon Electric Co., have captured 70 percent to 80 percent of the market. In the battle, prices have plunged so drastically that it is thought no company, American, European or Japanese, is making a profit on the 64K RAM.

Some small and medium-sized companies, such as Mr. Sanders' \$300 million AMD, will have to consider getting out of the market to concentrate on lower volume. more profitable products.

Large companies like Motorola Texas Instruments and National Semiconductor are expected to slug it out for the 64K RAM, the 256K RAM and succeeding generations — such as the 1-million-bit RAM -even if they lose money at

Worldwide sales of American and European semiconductor com-panies in 1981 fell 8 percent to \$9.2 billion, from \$10.0 billion. Mostek, for instance, a unit of United Technologies, lost more than \$100 million in 1981, although it made a profit in 1980, according to industry sources.

The U.S. companies claim the Japanese success comes partly from the backing of their government which had restricted American entry into the Japanese market and allowed the Japanese compa-

nies access to low-cost capital. The industry is trying to get some action from Washington, where frustration over Japanese trade barriers is mounting. Already bills have been introduced in Congress calling for trade recipro-

In addition, the administration is pondering whether it might re-strict imports of 64K RAMs on national security grounds, because of the strategic importance of hav-ing a strong semiconductor indus-

As recently as 1974, the U.S. semiconductor industry was unchallenged in the memory market. But the dynamic RAM, a high volume, standardized product, was the perfect target for the Japanese. It played to their strength - low cost manufacturing — and away from their relative weakness — innovation and the need to interact

with customers. U.S. companies' mistakes made it even easier for the Japanese. In the 16K RAM, the Japanese gathered a 40 percent market share because the American companies were caught short of capacity after the 1975 recession and because the Japanese produced chips with a smaller percentage of defects.

U.S. companies have neutralized those advantages but have still managed to trip themselves up in the 64K RAM. The Japanese designed relatively large and straightforward chips and came to market earlier. The U.S. companies tried to make their devices smaller and more intricate and got hung up in the manufacturing.

"We out-innovated ourselves." said a former semiconductor company executive who asked not to

All the securities having been sold, this announcement appears as a matter of record only.

IN CORPORATE FINANCE MIGHT SURPRISE YOU.

At Bankers Trust, corporate finance is not a sideline, but one of our principal lines of business. The resources we have dedicated to this business are yielding significant results.

cant results.

In the past two years, we closed 28 mergers and acquisitions for clients such as Thomson Newspapers Inc. and Armco Inc. We arranged private placements for RCA Credit Corporation, Export Development Corporation of Canada and The Cleveland Electric Illuminating Company, to name a face. to name a few.

We advised U.S. Home Corporation on the purchase of over two million shares of common stock by Société des Maisons Phénix S.A. through a public tender and

Phénix S.A. through a public tender and private placement.

We negotiated a \$59-million dual currency aircraft lease for KLM Royal Dutch Airlines with debt in Dutch guilders.

We provided financial advisory services to a joint venture project formed by American Can Company in Mexico.

And we facilitated the divestiture of assets of the oil field service operations of the Chromalloy American Corporation by providing both debt and equity for the purchaser in a leveraged buyout.

These examples represent only a fraction of the corporate finance transactions that we've closed in the past year. But they

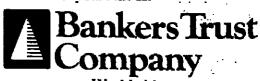

that we've closed in the past year. But they reflect our commitment to the broadest and deepest involvement in the following areas:

Mergers and acquisitions, private placements, international financings, lease

ments, international financings, lease financing, venture capital, project finance, and many other specialized services.

To carry out our commitment to this vital business, we have assembled a staff of over 70 professionals with career backgrounds in investment banking, corporate development and international finance. This kind of talent, backed by the financial and information resources of this major bank, has created unusual benefits for users of all of our corporate financial services.

Perhaps we can create some unusual benefits for you. Ask us.

Developing Nations in Cash Pinch

panks to squeeze out the best pos-

But that competition is fading as banks shy away from expanding

their exposure. Currently, Mexico's state oil agency Pemex is tapping the inter-national market for \$2 billion and managers report the operation is a tremendous success despite the withdrawal of Mideast banks. Interest on the the four-year loan, renewable for four years at the option of lenders, is set at % point

over the London interbank rate. Because the margin is the highest seen on such high-grade Mexi-can paper since 1979, banks have clamored to get into the deal and the lead management group, which started with 20 banks each underwriting \$100 million, now consists of 29 banks and likely will rise to 30. Managers insist that the increased participation will not result in a larger loan to Pemex but rather will be used to reduce the amount each bank is asked to un-

The managers claim that the re-duction in the underwriting com-mitment (which results in smaller commissions for each participant) irked the Arabs and resulted in their pullout. But Arab Banking Coro. says it was not consulted on the strategy decision to widen the management group rather than in-viting other banks into a second-

tier co-manager status. Another operation that has generated some heat is a \$175-million short-term facility for Pakistan. Originally seeking a \$350-million loan, Pakistan changed its mind midway during the negotiations, bankers report, and sought terms on a smaller loan. Citibank pulled out, arguing that the terms Pakistan isting on were unjustifiably low. Others in the syndicate say that Citibank was piqued because it was not asked to bid on a willingness to pay a 2-point margin over prime.

the smaller loan.
In the end, Bank of America, final \$50 million for three years

utility, Segba, is reported to have awarded the mandate for its \$200 million toan to a group of banks headed by Arab Banking Corp., Bank of Tokyo, Crédit Commercial de France, Gulf International Bank and National Westminster. Interest will be set at 11/2 points over Libor for the first four years and 14 for the final four. Lenders using the prime rate as a base will be paid is point less on both por-tions. The only difference in terms with those set recently by Argentina's petroleum company YPF are on the front-end fees and legal costs, which are reported to be slightly more generous to the

Paulo electric utility, is seeking \$250 million for eight years, offering 2½ points over Libor or 1½ point over the prime rate. The no-table element in this transaction is the widening quarter-point gap between Libor and prime margins. The usual standard was an eighth of a point difference. But borrowers argue that as the prime al-ready includes a profit for the banks whereas Libor is more of a more of a gap.

the loan tied to the prime rate to no more than 40-to-50 percent of the total, Electrobras has indicated

maturity the bonds would be

New Eurobond Issues Swell As Interest Rates Decline

(Continued from Page 7) knowledged not to be the going market rate. But if interest rates decline, as some analysts believe they will, such relatively high coupon paper could become quite attractive. În case rates do not decline, however, investors need not fear being locked into this issue, which would then not perform well, as they could opt for the floater which would be expected

not to trade below 98. The floater assures that at every six months the issue will bear a coupon at the the going market level. However, as most floaters offer a coupon slightly above Libor, the Swedish paper would be expected to trade at a modest discount. Nevertheless, the issue still offers investors who are willing to take a view on the direction of interest rates a floor level at which

they could bail out if desired. port is offering \$200 million of 12year zero coupon bonds offered at a price of \$197 for each \$1,000 certificate. This works out to a guaranteed capital gain of 407.6 per-cent at year 12 or, looked at another way, an annual yield equivalent to 14½ percent. It is believed that a portion of this issue has been preplaced with Japanese investors.

The other issues announced last week were marketed smoothly, but generated no particular enthusiasm. These included:

 Australian Industry Develop-ment Corp.'s \$50 million of fiveyear paper bearing a coupon of 15½ percent. Only \$25 million is being offered initially and the remainder can be tapped into the market over the next four years a feature the managers have not brought to the market's attention. Bankers said they were irked by the commission structure totaling 1½ percent compared to the more traditional 1½ percent. Most of the reduction falls on the selling group, which is allowed a skimpy % percent (down from a more normal 1% percent). Managers collect a fee of 1/2 percent and 1/4 percent is given to un-

derwriters. Australian Resources Development Bank's \$100-million "tap" issue. An initial \$30 million of these five-year notes, bearing a coupon of 13½ percent, are offered at a discount of 931/2 to yield 15.46 percent. The remaining \$70 million will be sold as conditions warrant. Occidental Petroleum's \$75 million of five-year bonds sold at par bearing a coupon of 16% per-

Nova Scotia's \$75 million of seven-year bonds, offered at par bearing a coupon of 15% percent.

In the floating-rate sector. Dome Petroleum is offering \$50 million of seven-year notes with in-terest set at a quarter-point over Libor. Each note bears two warrants, exercisable over the next 12 months, to buy seven-year fixedrate paper bearing a coupon of

"Too Exotic"

In the Deutsche mark sector, issues for Telefonica of Spain (100 million DM of 10-year bonds offered with a coupon of 101/2 percent) and Mexico's Nacional Financiera (150 million DM of eight-year paper offered with a coupon of 11 percent) were regarded as too exotic and were trading on a when-issued basis at 14-point

Saudis Increase Imports, Exports

IIDDA — Saudi Arabia has re-ported major increases in its 1981 imports and exports and said Japan topped its list of business part-

The Ministry of Finance and National Economy said Saturday the country's total 1981 exports reached a record \$117.5 billion, an

increase of \$12.2 billion over 1980. It said Saudi Arabia imported \$34.5 billion worth of goods, with Japan topping the list at \$9.3 bil-lion. The United States came second, with \$7.25 billion.

2nd Dry Well Reported By Exxon in N. Atlantic

United Press International NEW YORK — Exxon, the first company to drill a well on the Georges Bank off the New England shore, has hit a second dry hole in the area.

Exxon had its first dry hole on the Georges Bank in the North Atlantic after drilling a wildcat well to 14,118 feet in November.

Experts Question Alternative Plans For U.S. Budget

(Continued from Page 7)

gross national product — that is, the rate of increase in real output plus inflation — they want. The Reagan administration projects annual increases in nominal GNP averaging about 10 percent a year for the next five years, a pace that Mr. Penner and several of his AEI

colleagues regard as inflationary. Federal Reserve policy is aimed at producing only an 81/2 percent to percent rise in nominal GNP this ar and declining year by year af-One key question in choosing a

target rate of growth for nominal GNP is how much pressure one wants to keep on inflation. The lower nominal GNP growth, the less rapid will be the recovery from ssion with unemployment stayif renewed. CVF, meanwhile, is seeking \$100 million for one year,

ing higher, longer.
So far, none of the proposals emerging on Capitol Hill to tame the budget tiger is very explicit about some basic questions: What rate of economic growth do Messrs. Hollings, Domenici and other alternative-budget authors have in mind? How much of an easing of monetary policy, if any, is needed to offset the restraining effects of reducing prospective federal budget deficie?

Aiming a bit lower for nominal GNP growth while having some-what faster money growth would, in present circumstances, probably still leave interest rates at very high levels relative to inflation. But it might also make less likely a headon collision between monetary and fiscal policy about a year from

Final Approval of Ford Pact Appears Certain By Donald Woutar

Los Angeles Times Service

DETROIT - Worker approval of a historic labor agreement between Ford Motor and the United Auto Workers appeared a virtual certainty over the weekend, setting the stage for a likely resumption of talks at General Motors Corp.

The vote was 75 percent in favor of the agreement by late Friday, when 57 of the 94 Ford union locals had finished balloting. Union leaders were confident the pact would win final approval Sunday and take effect Monday. The settlement, marking the first

time the powerful UAW has retreated at Ford and the first time an auto company has promised a lifetime paycheck, is expected to be worth \$1.1 billion to Ford over the next 30 months. Tantalized by his competitor's dollar savings, GM chairman Rog-

er B. Smith made a direct appeal for support on labor-cost relief in an unusual letter that began reaching the homes of 600,000 hourly and salaried employees this week The three-and-a-half-page letter purports to spell out "the facts of

life in our business today" and reviews GM's \$19.80-an-hour labor costs in contrast to those of Japa-nese competitors and of other U.S. companies from whom the company is increasingly buying components. If enough GM workers appear to support a resumption of the ne-gotiations that collapsed Jan. 28,

the two sides could be bargaining again within a few weeks. Ratification by Ford's 171,000 UAW-represented workers began last Sunday after the tentative

halls around the country indicated lopsided approval. The voting was to conclude by 6 p.m. Sunday.

One potential trouble spot, Ford's 20,000-member local 600 at the huge Rouge industrial complex in Dearborn, Mich., recorded a 64percent yes vote by late Friday with voting at 12 of 14 units completed. Some of the most active union opposition to granting Ford concessions was centered at the Rouge local.

The voter turnout has been low. which a union official in Detroit speculated was because the early sults have been so lopsided. Many who would have voted in favor are not bothering to vote at all.

The agreement freezes the average \$9.90-an-hour base wage of Ford workers for 30 months. defers cost-of-living increases for nine months, and eliminates what would have been 24 paid days off between now and the September, 1984 expiration date of the con-

In return, the union won a guar anteed income for tens of thousands of senior workers if they lose their jobs, a conditional 24-month moratorium on plant closings, profit sharing, improved layoff and pension benefits and other in-

Similar talks failed at GM in late January. The collapse stemmed from widespread opposition among workers, who noted that the company earned a profit last year in contrast to Ford's \$1

Since then, GM has made good on a promise to close plants that it

agreement Feb. 13. All week, results of balloting from local union side facilities. Of eight GM plants whose closings have been announced since the failure of the UAW negotiations, five — carrying about 11,000 workers - are being padlocked because of high labor costs. Some assembly plants have been shut down because of poor car sales, and GM has indi-

cated the plants would reopen if

sales improve.

The plant closings and the details of the Ford agreement, which contains fewer worker concessions than many expected, have apparently changed the thinking of many GM workers on the question of returning to the bargaining table. A number of rank-and-file members of the union's national bargaining committee say their members are willing to talk again with GM.

"It's changed now," Tony Fernandez, president of a Linden, NJ, local said Saturday. He said he expects GM and the union will be bargaining again no later than

Mr. Fernandez remains opposed

meeting for Sunday to "give them the facts of life, that we may have

to go back to the bargaining table." It is no secret that union boss Douglas Fraser would rather bargain now than in September, when negotiations would normally re-

Rutgers guard Brian Ellerbe held on tight to the ball he'd stolen from Tony Washam (11) during a first-balf scramble in Saturday's 74-64 victory over West Virginia. The Mountaineers' defect and of the stolenge of the stole feat ended U.S. college basketball's longest winning streak at 23.

Backstretch's Barrera Back on Top

By Bill Christine

Los Angeles Times Service
ARCADIA, Calif. — In 1979,
the people who run New York's
Saratoga Race Track threw a party for the four living trainers who had saddled Triple Crown champions. Jimmy Jones (trainer of Citation), Lucien Laurin (Secretariat), Billy Turner (Seattle Slew) and Laz Barrera (Affirmed) were all there.

Suddenly it struck Barrera that the affair might be more like the Last Supper than a party. "When they announced us to the crowd as the four living trainers, that word living hit me," Barrera said. "I was going to have open-heart

surgery in three weeks." That surgery — three bypasses took Barrera away from the only business he has known since growing up around Oriental Park in his native Havana. A member of

racing's hall of fame, recipient of four Eclipse Awards and the game's leading money-winning trainer from 1978 through 1980, Barrera did not go out of business during his recuperation because his son Larry took charge of his

But in 1981 Barrera's name was

coming back for more. When he got his fourth Eclipse Award as conspicuously absent from the list of top 10 trainers. That's as im-plausible as a Rockefeller's being overdrawn at the bank.

Now, although the 1982 season is young Barrera is back. His horses have earned more than a half-million dollars in purses and through mid-February no other trainer is close.

Barrera's strength through the vintage years has been, as they put it on the backstretch, "the big horse" — Bold Forbes, winner of the Kentucky Derby and the Belmont Stakes: Affirmed, Triple Crown champion and twice horse of the year.

And this year, although a couple of stakes do not a paladin make, the potential exists in It's the One, a King Kong of a thoroughbred who will try to prove that John Henry is fallible a week from Sunday in the 45th renewal of the Santa Anita Handicap here.

"I Like My Chances"

Sitting in his stable office after It's the One had returned from a light gallop, Barrera said: "He is in tip-top shape. John Henry is never easy to beat and Charlie Whittingham has some horses [High Coun-sel, Perrault and Providential II] that will be tough. But I like my

It is borses with the promise of It's the One that keep Barrera year.

BOOKS

BRAIDED LIVES By Marge Piercy. 441 pp. \$15.50. Summit Books, 1230 Avenue of the Americas, New York 10020. Reviewed by Anatole Broyard

CCTOU'VE made a fine mess of -I things! Why didn't you keep denying?" This is Mike, Jill's first lover, speaking for the '50s. He wants Jill to deny to her parents that they are lovers. He denies it himself by describing it in vulgar terms to his friends. He also denies Jill's poetry, saying "most of what you write is just

Jill says of her parents that "they want nothing good for me, nothing I want for myself, not an education, not freedom, not compatible friends, not love, not a chance to write." When Jill gets pregnant, her mother nearly kills her with a home-made abortion.

Growing up in the '50s was a sorry business, according to Marge Piercy. People thought in categories, everything was labeled, and men and women lived in what Aldous Huxley called a hostile symbiosis. Marriage for women was an excuse for identity; for men, it was a way of taming love. The title "Braided Lives" implies that only women achieve intimacy with one an-

Yet what an intimacy! It reaches its climax when Donna, Jill's cousin, comes to die in her apartment of a botched abortion. Or when Jill, fighting with Stephanie for possession of Howie, seizes her and kisses her in a sudden realization that they are more

real than he is.

Most of "Braided Lives" takes place at a college where the women seem to study only men. Yet there is not a single decent man on the campus. They are all callow, chauvinistic, conceited, spoiled.

Solution to Friday's Puzzle

One woman is seduced by her psy-choanalyst. When she complains, he conspires with her family to have her committed to a mental hospital. Don-na is seduced by her sister a husband na is sequeed by ner sister a misoana, and it is her own husband who sadistically tampers with her displicagm so that she will get pregnant. Donna it also raped and beaten up by a hood-

lum she flirted with. Mike becomes a drunk. Donna becomes a speed freak. Julie, another
woman student, turns into a breeding
machine, claiming that this is all marriage is good for. Bolognese, Jill's platonic friend, needs shock treatments.
Howie, Jill's oldest pal, survives inter
for most of "Braided Lives," only to
reveal himself in the end as a coward. reveal himself in the end as a coward.

It is plain that Piercy is trying to tell us something — far too plain, so that her book often reads like a pothat her book often reads like a po-lemic. Jill is the only person in it who has any generosity, and whether this is legitimate or not, the reader gets the uncomfortable feeling that she is the author's alter ego. She is right, and ev-erybody else, is wrong, July is the spirit of the 'ols, ahead of her time.

As if she irrors where a con-

4 KT/ 10 MT/

of the 60s, shead of her time.

As if she knew what a grim book she had written, Piercy frames it in an idyllic affair, from which full, happily settled now with an ideal man named Josh, looks back on the '30s from her eminence, is a recognized poet and "fulfilled" women. Now and again in the text of the novel, this older Jill intrudes with italicized editorials, thumbnail biographics, civil rights speeches, and what have you.

Yet, with all this, "Braided Lives" is not altogether uninteresting. There is something about Jill that gets to you. The fact is that she is right, to a degree, and she is astractive. Piercy

degree, and she is attractive. Piercy has somehow braided her own affec-tion into IIII so that we leel it.

She is sturdy in some odd way, tough in her principles, but not in her emotions. She asks for a lot, but is prepared to give as much. When she says "I am saddened that my adventures must be with men," you feel the justice of her sadness, the voluptuousuess of her moral indignation.

Anatole Broyard is on the staff of The New York Times.

.By Robert Byrne

CHESS

FTER four rounds of the 10th A FTER four rounds of the 10th Reykjavik international tournament, Dimitry Gurevich, a 25-yearold international master from the Bronx, held the lead with a perfect 4-0

SCOTE. Gurevich, who emigrated from the Soviet Union two years ago, defeated the Yugoslav champion, Grandmaster Bozidar Ivanovic, in the fourth round. International Master Helgi Olafsson of Iceland and International Mas-

ter Lars Ake Schneider of Sweden shared second place with 31/2-1/2 re-cords in the 11-round Swiss-system event in which 54 competitors are entered.

In the first round, Grandmaster dent of the International Chess Federation, saved a lost position against in-ternational Master Vitaly Zaltsman of Brooklyn by seizing the chance for a sudden, decisive mating attack.

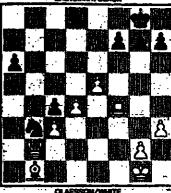

For the routine 11 B-Q3; P-K4; 12 Q-B2, R-K1; 13 NxP, NxN; 14 PxN, QxP, Olafsson substituted 11 Q-B2. with the point that, after 11 . . P-K4; 12 B-N5. Black could not maintain the tension in the center. More-over, a complete clearing of the pawn center with 12 . . . BPxP, 13 BPxP, PxP, 14 NxP would give White super-

After Zaltsman's 12 . . . P-K5; 13 N-N5, P-QR3! there would have been no use retreating, with 14 B-K2?! because 14 . . B-B4; 15 P-B3, 15 . . PxBP; 16 QxB, PxB concedes

Black a comfortable gain.

Zaltsman's 17. B-N3! made sure that Black would retain control over his vital K-5 square — thus after 19. BxN, the White center was heavily blockaded.

(26 B-N[?!, Q-KN3!).
On 26 ... QxRP, Olafsson should have transposed into the hypothetical

variation of the penultimate note with 27 BxN, etc., but he brazenly went on a fishing expedition with 27 P-K4?
This should have led to Zaltsman

d rest . تأواعة St. 13.

Z 15 B

Tede .

This should have led to Zaltsman's obtaining a winning position by 31 . . PxP; 32 QxP, NxP; 33 QxP, N-K3, but instead he let the wity Icelander off the hook with the sad blunder, 31 . . Q-R2? Olafsson immediately jabbed his pike in with 32 P-K6! BPxP; 33 Q-K2! On 33 . . Q-K2, 34 Q-R5!; there was no defense by 34 . . P-N3; 35 BxP!, PxB; 36 QxPch, K-R1; 38 R-R4cl); 37 R-B7, winning the green.

37 R-B7, winning the queen.
But Zaltsman's desperate
34. P-N4 was belayed by 35
BxPch! In view of 35. QxB; 36
QxPch, Q-N2; 37 QxRch, K-R2; 38
R-R4ch, K-N3; 39 R-N4ch, Zaltsman gave up.

NEW YORK - Chandra neeseborough broke her own orld record in the women's 220rd dash, Joan Hansen set a omen's two-mile mark and new-mer Veronica Bell set a surprisg U.S. record in the women's ng jump Friday to highlight acon at the U.S. Indoor Track and eld Championships, which lost any of its top stars at the last

The state of the s

Even though Mary Decker Tabb as injured an unable to compete, world record was still established a thrilling women's two-mile

Hansen, Brenda Webb and Mararet Groos waged a tight duel and oth broke the old record of 9.38.1 t last year by Francie Larrieu. Hansen won the race in 9:37.03 and Webb was second in 9.37.64. ist nipping Groos in 9:37.65. Lar-leu finished fourth in 9.44.85. "I went out fast, but then I let ne others do all the work," Han-

an said after running the first two-

alle race of her career. "I can't be happier." Cheeseborough, who set a world scord of 23.27 in last year's meet, nproved on that mark in the preminary heats Friday with a time f 23.25. She later won the finals

f the event in 23.46. Bell, a virtual unknown who finhed sixth in last year's championhips, shartered the nine-year-old J.S. record with a jump of 21 feet, 1% inches. Kathy McMillantay's 21-21/2 took second place.
Martha Watson had held the old ecord at 21-41/2.

"I've been jumping over 21 in ractice but I'm just coming back rom the fin," said Bell. "I thought hat I'd be in the top three and exected to be over 21 feet, but the ecord came as a surprise to me." In other events, Stephanic High-

ower edged Candy Young in the romen's 60-yard hurdles, Evelyn sshford nipped Jeannette Bolden n the women's 60-yard dash, Tone Campbell won a sub-par men's nurdles in 7.13 seconds, Ron frown took the men's dash in 6.14, Keith Connor won the triple jump t 55-11, and Don Paige took the nen's 1,000 in 2:05.81.

Jim Spivey captured the men's faile in 3:57.04, Dwight Stones on the men's high jump at 7.4½, 3illy Olson won the pole vanit at 8-642, Coleen Rienstra won the vomen's high jump at 6-314, Fred jowerby won the men's 600 in 09.50 and Cathie Twomey won he women's mile in 4.32.92.

Connor had held the indoor

vorld record in the triple jump at 6-9½ until Willie Banks broke it ast week at San Diego with a leap Banks finished third Friday,

umping only 54-111/2. "I'm surprised I beat Willie lanks," Connor said. "He's really

Hightower and Young had finshed in two world record setting lead heats this year, and they were ilmost as inseparable this time. They were both timed in 7.38, just 0.01 off the last record they set, out Hightower was awarded the itle for her lean at the tape.

"I was going for a world record," said the winner, "because you don't like to share anything." A week ago, Ashford recorded a controversial world record of 6.48, when three of the six starters thought it was a false start and did not race. One of those who stopped was Bolden, who owned the former record of 6.60.

ln Friday's race, Ashford left no doubt as she bolted from the start and sped to victory in 6.54, with Bolden second in 6.59.
In third place was Cheesebor-

ough in 6.62. Several of the meet's top attractions were last minute scratches. World record holder Renaldo Nehemiah withdrew from the men's 60-yard hurdles, citing fatigue from a television competition n Florida, a reason also given for the pullout of miler Sidney Maree. Nehemiah's chief rival, Greg Foster, also pulled out because of

a recurring leg injury. Brown was noider Stanley Floyd continued to suffer from a back and hamstring ailment and pulled out of the 60yard dash and Carl Lewis withfrew from the same race to concentrate solely on the long jump.

Despite what he called a "diffi-

Lloyd and Jaeger Will Meet in Final

United Press International
OAKLAND, Calif. — Top-seed Chris Evert Lloyd breezed past fourth-seeded Sylvia Hanika of West Germany, 6-4, 6-1, Saturday night to advance to the final against Andrea Jaeger in a women's professional tennis tournament here. Jacger got off to a shaky start but came back to overcome West German Clandia Khode, 3-6, 6-3, 6-2.

Jaeger reached the semifinals by turning back seventh-seeded Barbara Potter, 6-4, 7-6, Friday, while Khode eliminated fifth-seeded Wendy Turnbull of Australia, 6-4. 6-2, and Lloyd beat Leslie Allen, 6-3, 3-6, 7-6. Virginia Ruzici of Romania twisted her right knee in the second game of her match against Hanika and had to retire.

Lendl Beats Gernlaitis

GENOA (AP) - Top-seeded Ivan Lendi of Czechoslovakia deeated Vitas Gerulaitis of the United States, 6-7, 6-4, 6-2, 6-3, in the inals of a professional tournament here Sunday. Lendl had beaten Viay Armitraj of India, 6-4, 6-4, in Seturday's semifinals, while Geru-aitis had rallied to down Buster Mottram of Great Britain, 4-6, 6-1,

cult" runway. Lewis won that event and barely missed his world record of 28-1, which he set last month by leaping 28-%. He is the only man to have broken 28 feet

Spaniard Sets 600-Meter Mark

MADRID (AP) — Coloman Trabado of Spain set a world in-door best for 600 meters of 1 minutes, 17.2 seconds Saturday in a meet here. The previous mark, 1:17.3, was set by Milovan Savic of Yugoslavia Jan. 25, 1976.

Pole Vault Record

KANSAS CITY, Mo. (AP) — Billy Olson, on his third attempt, cleared 18 feet, 10 inches Saturday night and broke his own world indoor record in the pole vault dur-ing the NAIA Indoor Track and Field Championships. It marked the fourth time this

year the bespectacled star broke the world indoor pole vault record. "It wasn't really that good a jump," he said moments after clearing 18-10.

"I was a little too far away from the bar, and I touched the bar a little bit going over. But when I saw it wasn't falling, man, did that feel good." Olson then failed at two at-

tempts to clear 19 feet and chose not to make a third attempt due to of exhaustion. "I'm so tired I can't stand up,"

OSLO - Matti Nykanen, a Finnish teenager, won the controversial 90-meter jump Sunday, the final day of the World Nordic Ski he said. "And my hamstring is real sore and I didn't want to take a chance on getting it hurt."

Players in NHL Being Polled On Stiffer Rules for Fighting

By Dave Kindred

Washington Past Service
WASHINGTON — National Hockey League players soon will be asked if they want to abolish

At a meeting here during the allstar break two weeks ago, the NHL Players Association instructed the teams' union representatives to report in June with a sense of the membership on whether the union should press the league for measures to eliminate fighting. Said Rick Green, the Washing-

ton Capital player representative: "It was brought up with the words abolishment of fighting," and we reps were asked to get ideas from players on our teams."

Ambivalent

Green said he hasn't asked his eammates about it vet. Personally. he is, like most hockey people, ambivalent on the subject.

He detests the game's goons.

To control what he calls "the dummy acts," Green thinks all as the referee, should have authority to call all penalties. As it is, only the referee can assess penalties for such fouls as tripping, high-sticking and fighting.

And perhaps, Green says, the penalty for fighting should be raised from five minutes to 10. The fighting clearly bothers him. Yet he wouldn't want to play hockey without the possibility of

Why do hockey officials stand and watch while two players grab each other's sweaters and proceed to bash each other in the face? Why don't, as in other games, the officials leap in and stop the fight?

"Because," said Green, a six-year veteran, an eminently sensible guy, "it's part of the game." Part of the game is to rearrange someone's nostrils? "It's a release," Green said. "You may see only the fight. I can guarantee you that something preceded it — cheap shots, tripping the referee didn't see, aggravation that shouldn't be

going on.
"Finally, when the referee doesn't do anything, you got to turn around and punch the guy."

So a punch is thrown, in a kind of vigilante action. Why does the official just stand there and let 20

punches be thrown? "Not too many guys get hurt too bad," Green said. He touched his cheekbone, where three or four scars were within finger's reach.
"The referees will jump in and stop it if they see it's too bad."
But there are aggravations and frustrations and cheap shots in

other sports, and yet fighting is not considered part of the game — is, in fact, punishable by fines and suspension. And officials are or-dered, as we see in the NFL, to put their bodies between the combatants immediately.

Shrugged Green: "I know."

Green believes the incidents of real violence are blown out of proportion. It is not as bad as it used to be, he says, and the continuing collapse of the Philadelphia Flyers is proof that bully-boy tactics no neer succeed. So saying, Green still admits the

league has a problem. Good players have to worry that some guy who can't play is out to intimidate them and throw them off their game. That's bad. You just can't bave wese goons running around doing their dummy acts. That's not hockey. People who believe hockey

teams use fights to sell tickets point out that "highlights" film clips provided by the teams to lo-cal TV sports departments often Green's is a seemingly paradoxi-

yet a necessary element of what can be a beautiful game. Fighting, he says, is better than a stick in the Let's say there are rules against fighting. Green says the frustrations, aggravations and cheap

cal belief that fighting is ugly and

shots would still take place. And if a goon is going to be thrown out and fined, why should he go quiet-ly with a simple little no-harm fist-Giving the linesmen more authority. Green said, would be a good first step toward controlling

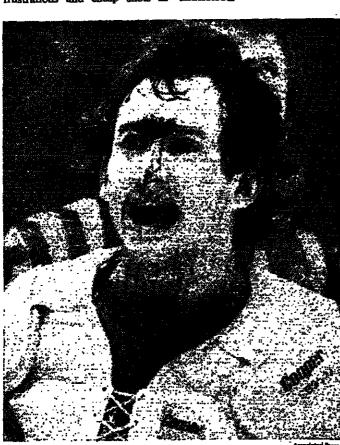

some of the stuff that produces fights. The linesmen are able to see a NY Runger lot of things the referee can't. That way all the pressure wouldn't be

on the referee to catch every little thing."
Fights are forbidden in European hockey. Hockey there is all finesse. So we are led to believe.

Green would wise us up.
"Fighting isn't allowed, but they can be pretty cruel with the sticks. It's finesse and fundamentals, no question about that, but a lot of the time, when they know they can't fight, they are going to stick you and hurt you."

A stick in the eye or the throat or across the back of the neck. "Some guys wouldn't think twice about spearing you in the stomach," Green said. "It takes a different breed to do that,

but ..."
The sentence was unfinished but

Philadelphia center Ken Linesman after an early-season workout with several Pittsburgh Penguins: An end to bully-boy tactics?

Joan Hansen couldn't quite believe it when her record-setting two-mile time of 9:37.03 was posted Friday night in New York.

Nykanen, 18, showed his talent when he exploded in a breathtak-ing first-round jump of 108.5 me-ters (355 feet, 9 inches). His second

jump, of 102.5 meters, was enough for the title with a total of 257.9

Olav Hansson — maintaining Norway's streak of winning at least one medal in each of the 13

events here — was silver medalist with 255.1 points, and Armin

By Sam Goldaper New York Times Service

NEW YORK - As the regular season heads into its final weeks, there is general agreement around the National Basketball Association that Jim Paxson, Kelvin Ransey, Darnell Valentine and Billy Ray Bates give the Portland Trail Blazers the finest backcourt in the

Sunday's jump competition took place amid thick fog and falling snow. The jury decided, after an The collective talents of the hourlong debate, to go ahead — but the jumpers did not approve. "This event is a pure gamble," said Portland guards are a foursome that every team in the league would like to put together," said Butch Beard, New York's assistant coach, before Saturday night's 107-105 Knick victory over the Trail Blazers here. Portland's seventh loss in its last eight games dropped its season mark to 29-27.

up an airplane to pour chemicals into the fog, but to little effect. "I find it unbelievable I man-"If it's direction you want, they have Ransey and Valentine. They have the big guard who can score in Passon. He is a lot quicker than aged to win," said Nykanan, the reigning junior world champion. "I most people think. Bates is Mr. Excitement. He is capable of coming off the beach and giving you a bundle of scoring points.

The only thing I would say they are lacking is the real big, de-But Nykanan, who gave his country its only gold of the games, controlled his nerves superbly. "I fensive guard who can play sometried to think this was just one of those events at home," he said. Gervin.'

Beard, who played on four teams during his 10 pro seasons, noted that backcourt play has undergone tremendous change.

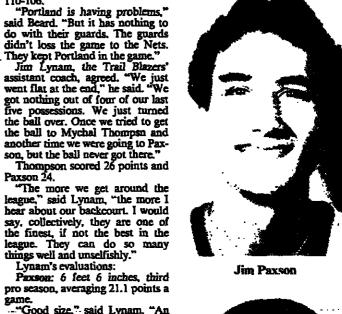

"It has become very sophisticated," he said. "The days when they used to refer to the guards as the left and right guards are over. When someone goes out to scout a player or a team now, he looks for the big and small guard, his play-making ability, whether he can

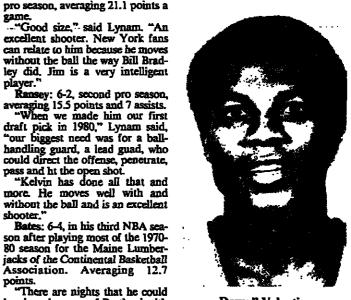

penetrate and pass the ball. "The days are long gone when the only guards the fans related to were those who scored a lot of more important, than a guy that can just put the ball in the basket. The point guard is the leader. He controls the tempo of the game a good point guard will keep everyone involved and the ball moving."
Beard had been at Friday night's

handling guard, a lead guad, who could direct the offense, penetrate, pass and ht the open shot.

"Kelvin has done all that and more. He moves well with and without the ball and is an excellent shooter.' Bates: 6-4, in his third NBA season after playing most of the 1970-80 season for the Maine Lumber-jacks of the Continental Basketball

Association. Averaging 12.7 points.
"There are nights that he could points. The point guard today is probably as important, if not more be elected mayor of Portland with some of the things he does on the court," Lynam said. "When he is going well, he is the spark off the bench. But he can also be erratic. Has the most athletic equipment on the team. A great jumper and game in New Jersey, when the Nets rallied from a 14-point deficit choice. Averaging 7.7 points and

Darnell Valentine

along with Thompson and Calvin Natt, have carried the Trail Blazers

"We began with seven straight victories." Lynam said, "but then came the injuries — a lot of them. But the player we miss most is Kermit Washington. We counted on him after he enjoyed his finest season last year. But he never was really there. "He played a few minutes here

and there and then would miss the next five. That was the pattern. When you go into a season expecting someone and then don't have him, you just can't make up for it." Recurrent injuries finally forced the 30-year-old Washington, a power forward, into retirement some weeks ago.

World Yacht Race Begins Final Leg

The Associated Press MAR DEL PLATA, Argentina Twenty of the world's best racing yachts hoisted sail Saturday and headed for Portsmouth, England, on the last leg of the roundthe-world yacht race.

The 20 are the survivors of a field of 29 that left the English port Aug. 29 as part of deep-water sailing's premier event.

The yacht Charles Heidsieck III of France was leading on handicap time after the 20,140 nautical miles covered in the first three legs. It was followed by Kriter IX of France and Flyer of the Netherlands, which had the fastest actual time. Handicaps are figured according to the size of the boat.

Hearns Wins on KO in 1st United Press International

LAS VEGAS — Thomas Hearns knocked out Marcos Geraldo of Mexico at 1:48 of the first round Saturday in a scheduled 10-rounder. It was Hearns' second straight triumph in the middleweight divi-sion since he lost his WBA welterweight crown to Sugar Ray Leonard last September.

has transformed! news about jams on the way to work into a kind of space odyssey. "I love the morning radio traffic reports," writes Judy Katz of New York City. The approach

to the bridge is Safire crawling, they say. The Brooklyn-Queens Ex-

pressway is creeping. The Bronx-Whitestone Bridge is heavy. Years ago, Ed Bleier of Warner Communications had a great idea about a radio station programmed exclusively for people in automobiles, playing music for driving, featuring news about traffic and editorializing about potholes. sponsored by auto companies and local carwashes. He was prophetic: today, many radio stations concentrate on drivers tuned to car radios during rush hours, and with this new concern for the driving listener has come the voice of gloomy

Gus Gridlock, the anchorman of

the freeways.

No Longer in Helicopters Gus is no longer shouting over the noise of a helicopter hovering over some accident which is backing up cars clear out past the Beltway; high-flying reporters discovered that planes could not fly over many metropolitan locations or structures such as bridges. Today, traffic-caster Gridlock is pretending to sit in a Situation Room of the driver's mind, with video screens surrounding him, surveying every potential traffic bottleneck for miles around; in 12 cities, from Boston and Baltimore to Denver and Los Angeles, this service is called Metro Traffic Control, evoking Houston's Mission Control.

The service, now carried by 126 radio stations, is the three-year-old brainchild of David Saperstein of Baltimore. "We train our reporters to deliver a traffic-cast," says Saperatein. "Some expressions work only in certain areas of the

country. For example, 'rolling backup' works only in the D.C.-Baltimore area, it's not generally known elsewhere." Don't confuse that with residual backup, which means that the problem has been cleared, but because the jam was so long it will take time for traffic to return to normal speed.

Glen Ivey, a computer prorammer and analyst for Metro Traffic Control, explains that rolling backup means that traffic is moving, but so slowly that the end of the backup continues to grow. In Denver, this condition is called

slow and go. A person whose curiosity causes him to slow traffic is called a rubbernecker in Texas, a gonker in Detroit and a lookie-Lou in L.A. Such obstructive gaping is called gaper's block in Denver.

How do traffic-casters refer to stalled cars? By converting adjectives to nouns: A disabled vehicle is called a disable in Texas and a stall in Baltimore. In Minneapolis, stalls and disables along the icy roadways are called snowbirds.

At interchanges, where freeways merge, the traffic-casters have a field day reporting trouble. In Dal-las, beware the mixmaster; in Denver, motorists dread the mousetrap; in Detroit, the most jammable interchange is called the

In Detroit on days when roadways are icv. listeners are warned bunch and crunch; after dry spells in Texas, when oil on the road is suddenly mixed with rain the danger spoken of is slip and

As a linguistic looky-Lou, I welcome much of the argot of Traf-ficsnarl; because the reporting is inherently local, there is a happy diversity of descriptions of similar situations in different places. However, a danger of semantic backup comes from patches of foggy locu-

Resist all "advisories," just as sensible people hoot at memos that begin "Please be advised"; it's foggy talk, not legitimate Trafficsnarl. When the traffic-easters come up with happy coinages like "Malfunction Junction," wake up and applaud; if they adopt bureaucratic pomposities like "traveler's advisory," roll over and go back to sleep. Wait for a simple declarative sentence from Central Vocabulary Control

China's Great Sci-Fi Leap Forward

By Michael Parks Los Angeles Times Service

PEKING — The spaceship Far Eastern
Mark was hurtling at greater and greater
speed into the vast emptiness of a "black hole" so powerful that it was consuming a

huge, new blue star nearby.

The three spacemen on board the Far Eastern Mark knew that their entry into the black hole, a collapsed, dead star, probably meant oblivion. Yet they worked quickly and confidently at the spaceship's controls, testing with their lives a controversial hypothesis on the nature of black holes - and just managed to escape.

The spacemen are Chinese, and the story of their high adventures in outer space, a novel entitled "Flight Towards Sagittarius," is captivating China's growing audience for science fiction.

"People want to expand their horizons, their consciousness," said Zheng Wenguang, the author of "Flight Towards Sagittarius," and China's leading science-fiction writer. "These are modern fantasies, and like older fantasies they express ideas through illusions. On one level, I am writing about what might be, on another about what is — and put together they may be mind-blowing."

"Mind-blowing." Zheng repeated, pausing over the English expression, wondering how it would work in Chinese. "I do want to cause people to think, to cast aside their preconceptions, to see where society is taking us and where science is taking us, could take

Questioning the Future

Zheng, 52, an astronomer, does have the Chinese thinking with his stories and novels. His work constantly challenges their conception of themselves and questions the prospects for the future. "Will the future be Uto-pia?" Zheng said. "Maybe, but I am not sure here will be a future, and if there is, it might be just the opposite - anti-Utopian."

To Chinese, who are assured by Marxism that the future will get progressively better and communism will be the ideal society, Zheng's views are not orthodox, but he appears to be untroubled by this.

"To explore onter space, I read once, it is necessary first to explore one's own inner space," Zheng said. "That is why I prefer the homes that reflect our society. We have a lot of problems in our society today that require people to think. This is particularly true in the aftermath of the Cultural Revolution. So my works reflect my viewpoints on various social questions today as well as suggesting what the future might bring."
For this reason, Zheng's work is described

by some literary critics here as "social science fiction," but it also makes him one of China's

most highly regarded authors today.

Science fiction was little read here until

one of the most popular literary genres in China. Zheng's books are published in editions of 100,000 and more — and sell out within a week. An anthology of foreign science fiction with a printing of 420,000 was gone as quickly, and some books have had sales of more than a million in three or four

"Each new book only where the reader's interest," said Li Fuzhen, editorial director of Peking's Oceanic Publishing Co., which got into science fiction in 1979 as a sideline and has since become the major Chinese science-fiction publisher. "I think the readership must be growing geometrically. No other literary form has captured readers' imaginations as science fiction has in the past

two or three years." Many fans have formed clubs to buy books as they are published. Copies of books published six months ago are hard to get and sell for four or five times their original price. Half a dozen provincial science fiction magazines have been established within the past two years. After importing the 1976 Ameri-

The upsurge in interest in science fiction, benned during the Cultural Revolution, be-gan with the 1978 National Science Conference here, according to Zhang Haifong, chairman of Oceanic Publishing, whose main line is books on marine sciences.

People began to reshape their thinking, and there was a tremendous demand from young people to learn science and love science." Zhang said.

Anthology

Spurred by the interest of several editors, including Li, the publishing company decid-ed to put out an anthology of foreign science fiction in translation - Ray Bradbury, Isaac Asimov, Arthur C. Clarke, Stanislav Leni were among the authors — and the enthusiastic response led to a Chinese authology and then an additional 10 books in the last two

"Our aim is to enlighten people and encourage them to involve themselves in science, to be brave in exploring science, to build the motherland into a strong, modern state," Zhang said.

Educational Tool

Much of the new Chinese science fiction. as a result, is intended to popularize modern science, an effort strongly supported by scientists here. "Many older scientists feel that if abstract science or difficult concepts can be expressed in literary form they can be grasped more easily by the layman," Li said.
"Their point is not, obviously, to turn science fiction into texbooks but to expand the hori-

Hua Luokeng, China's leading mathematician, has begun writing science liction, and Ye Yonglie, a graduate chemist in Shanghai, turned a series of lectures on the outlook for the year 2000 into a book, "A Journalist Travels to the Future," that sold a million cop-

But the value of science fiction as an educational tool is debated here. A prize-winning story, "The Death Ray From Coral Island," which was made into a popular movie, was criticized for "misrepresenting science" and being too fantastic to be believed. Other

critics said the writing was poor.
"We still have opposition," said Zheng, who admires the story about two scientists who discover and harness a powerful light ray that then becomes the cause of a war as others seek it. "This opposition comes not from scientific or literary circles but from laymen who think science fiction must, first of all, be very scientific.

"My view is that sci-fi must first be good fiction. It is not our aim to popularize science alone but also to deal with scientific ideology, the scientific way of thinking."

Letter From Aswan

Feluccas and Fishing

By William E. Farrell New York Times Service

A SWAN. Egypt — The horse and buggy, its brass fittings gleaming in the sunlight, sits with a forlorn driver for hours near the Happi Hotel waiting for a passen-

The other night a belly dancer. Miss Ahly, undulated in a nightclub with only a handful of customers to view her twitching

Out on the glittering waters of the Nile, near the first cutaract of the great river, only a few graceful feluceas — small, narrow vessels with lateen sails - moved silently through the water with a scattering of tourists aboard. Many more were incored to piers waiting for customers. Normally at this time of year, Aswan is full of tourists taking advantage of the warm weather, flawless blue skies and joys of an easy-going easis filled with water and greenery and with the desert visible in the distance.

Assassination Aftermath

But the assassination of President Anwar Sadat Oct. 6 has cut deeply into Egypt's tourist industry, a key factor in the nation's precarious economy.

"I hope it will change much very soon," said Dr. Mohammed Sabry Zaki, a surgeon who is also governor of Aswan province. "Everything is secure here. There is nothing to annoy a visitor. Our income here is derived mainly from tourism, fishing and the sugar-cane in-

Fishing on a large scale is new to Aswan and is a result of the High Dam, which has controlled the flooding of the Nile and created an enormous lake called Lake Nasser. It is teeming with fish, primarily because very little fishing took place for several years after the completion of the dam. In 1980, 31,000 tons of fish were

taken from the lake, and that, says Zaki, is too little.

"We are fishing only 15 percent of the total lake, near the shores because it's still done by the primitive method — the felucea.

feluceas date back to the pharaohs. The center of the lake, which is more than 300 feet deep, is unexploited so far, Zaki said, but a Japanese company that specializes in deep-water fishing is working with local fishermen to reach into those depths and bring in the big ones.

In several respects the construction of the High Dam rejuvenated

Aswan, which in ancient times was a major marketplace for the exchange of products from Africa and the Mediterranean countries.

New land was irrigated, flooding was controlled, and electricity was

generated and fed to villages and towns nearby. Tourism increased. People were attracted by the dam as well as by the ancient and splendid temples of Philae dating from about 400

Israeli Visitory

After the peace treaty was signed between Egypt and Israel, Zaki said, "a lot of Israelis came and started to build a bridge of (riendship."

Hotels sprang up. These days some of the more modest ones are doing better than the plush ones because youthful tourists, especial. ly backpackers, have apparently not been deterred by the assassina. tion to the extent older travelers 5 have been.

One visitor each winter to with Aswan was the Aga Khan, who said neck-high immersions in the dry, soft desert sands eased his rheumatism. When he died in 1959, his wife had a huge mausole um built for him that stands imposingly in a desert setting just above their residence on the left hank of the Nile.

Zaki envisions the construction of a spa in Aswan to help those with rheumatism enjoy the winter is sun, the dryness and the unpollute

Besieged and Beseeched

Near the Aga Khan's mausoleum, a gang of camel drivers stands waiting for customers to take a -ride. A felucca with a few tourists docks near them, and the travelers are besieged and beseeched to ride (a) the lumpy, bad-tempered heasts.
One of the carnels refuses to

heed his master and lopes off toward a village nestled in sand dunes. Others shudder and show off their big, had teeth.
"Fine ride, fine ride," a young

driver says. The carnel is ordered to get up

from its crouch, and the ungainly creature rises with a snort on lumpy legs. It is the end of another slow day, and the young driver drags his beast homeward. "Tomorrow it may be better."

he says in Arabic, echoing the hopes of others here who want the hordes of tourists to descend again,

U.S.A.: Sandy O'Hera Internation

Important people trust the Trib.

of resident continental europeans listed in

the International Who's Who are regular

readers of the International Herald Tribune.

A recent survey shows that resident continental

Europeans listed in the International Who's Who

trust newspapers - two to one - over magazines,

radio or television. Moreover, 35% of them read

the International Herald Tribune... that's more than

read any other publication in the English language.
